NEWS BY TELEGRAPH.

INTERESTING FROM WASHINGTON.

Report of Secretary Cobb on the Condition of the Finances.

He Recommends a Revision of the Tariff and a Reduce of Treasury Notes.

The Case of Minister Lamar—Judge Roseveult as Successor Mr. Dallas—The New Loan, &c.

[Special Dispatch to the New-York Times.]

WASHINGTON, Thursday, Feb. 3.

Secretary Cass has been closely engaged all day in the preparation of dispatches for Minister Lamar. The Government finances the report of Gen. Cobb's subcommittee.

It is now believed that Judge Roseveult will succeed Mr. Dallas at London.

Twenty-millions and a half of the new loan have been paid into the Treasury.

The Naval Court of Inquiry continued to examine the case of John Marmaduke, Master, dropped by the Retiring Board, closed their labors to-day. The evidence presents a curious record. Lieut. John S. Missroon, of the Retiring Board, testified to Marmaduke's habitual drunkenness, and unable to do his duty. The Captain and two Lieutenants being called, testified that they remembered the storm referred to, but recollected that Marmaduke was sober and did his duty. Reasons will disagree.

Lord Napier accepts a complimentary ball, which will be given here on the 27th inst. The tickets are free, and limited to three hundred. Q.

[SPECIAL DISPATCH TO THE NEW-YORK TIMES.]

WASHINGTON, Thursday, Feb. 3.

The Secretary of the Treasury sent to the House, today, a reply to the resolution calling for the actual and probable receipts from the customs, public lands, and other sources, for this and the next fiscal year, and for his opinion whether the said receipts will be adequate to meet the public expenditures. He says that the receipts during the first quarter of the present fiscal year, ending September last, were nearly $[illegible], as stated in his annual report. The receipts for the remaining three quarters were estimated at $[illegible], of which sum $27,500,000 were estimated from the Customs. It was believed that the quarter ending December last, would yield $10,[illegible]; the present quarter ending March 31, $15,[illegible]; and the next quarter, ending on June 30, $[illegible].

In estimating, not only to the customs, but the public lands and other sources of revenue, all the information which has been received at the Department since the annual report, confirms the correctness of the estimates of the probable receipts for the present and the next fiscal year. He is, therefore, of the opinion that the result will show that the actual receipts for the remaining quarters of the present year and for the next fiscal year, will not vary materially from the estimates already submitted to Congress.

In support of this opinion he submits a comparison of the receipts for the same quarters of the past preceding years. During the fiscal year ending 30th of June, 1857, the importations were very heavy, consisting in dutiable goods, exclusive of those exported, to over $[illegible], and the receipts from Customs that year were $[illegible]. In the fiscal year ending June, 1858, the importations were much reduced, amounting in dutiable goods, exclusive of those exported, to $[illegible], and the receipts from the Customs to $[illegible]. To meet the large expenditures, the importation of dutiable goods for the present fiscal year must reach $[illegible], besides those exported, and for the next fiscal year the sum of $[illegible]. Comparing the foregoing statement of receipts, and looking to a favorable and healthy reaction in business, he should regard it as unwise and unwise to calculate upon a larger importation than the present estimates contemplate. Entertaining these opinions, he is compelled to say the receipts will not be adequate to the necessity of the public expenditure, unless the expenditures should be reduced below the amount estimated for. He has made no calculations that would induce the opinion that such a result can be reasonably anticipated; on the contrary, should the bills which have been passed by either branch of Congress, be finally passed by both, and become laws, the expenditures would be very largely and extraordinarily increased.

He estimated that the Pension bill alone, which has passed the House, will add several millions to the year's expenses of the Government, and even a larger amount for the new fiscal year. Other bills, also, which have either passed the Senate or the House, will, on a large estimate swell the amount of the expenditure. These are contingencies to which the attention of Congress should be directed in considering the probable receipts and expenditures of the Government. Either that expenditure must be reduced to the estimated receipts, or other means of revenue should be provided. If the first can be effected it is certainly most desirable. He has already recommended to Congress the codifying the revenue laws, and the reorganizing the collection districts, which, if adopted, would, he believe, would greatly facilitate the business of the Treasury Department, and increase largely the economy of collecting the revenue. There is still on the statute books laws requiring the building of custom-houses, and collection-districts, in places where the public service does not require them at this time. The repeal of these laws, and the postponement of their execution to a period of greater prosperity and less embarrassment, would relieve the Treasury to that amount of expenditure.

The recommendation to abolish the franking privilege, and raising the letter rate to five cents, with the view of bringing the Post-Office Department as nearly as possible to its former self-sustaining position, if carried out, very greatly relieve the Treasury.

In other departments, retrenchment might also in all probability be made.

The recommendations of those which have been brought before the Committees of Congress, and commends them to the consideration of the Committee. If, however, the approaching end of the present session shall reach the appropriations for the Secretary's Report, a deficiency will inevitably occur, which must be provided for by additional loan or Treasury notes, and to the extent which the expenditure exceeds the estimates will that deficiency be materially increased.

He feels it his duty to express the opinion that the revenue should be increased by additional duties. The present tariff should be so modified as to supply the deficiency as may exist, and he recommends a revision of the subject, expressed in his annual report, to favorable consideration.

He calls attention to the outstanding Treasury notes. In his estimates of receipts and expenditures, the permanent redemption of them as they may fall due, has not been contemplated. All the calculations have been made upon the basis of continuing them in the form, and as a matter of course the redemption of the whole or any part of them must increase the expenditure and deficiency, unless authority be given for funding, or other provision be made for their redemption. Since February last there have been redeemed $[illegible]. By the 30th of June next the sum of $[illegible] will fall due, at which time their payment must be met.

If Congress adjourns without legislating on the subject, it would be almost impossible, under the most favorable circumstances from ordinary sources, for the Department to meet the public liabilities until another session of Congress shall be convened. He had already recommended that the authority should be procured for funding the balance of the Treasury notes for more two years. This can easily be effected by extending for that period the provisions of the act of December, 1857, authorizing the issue of Treasury notes. The proposition to convert these notes into a permanent debt ought not to receive the favorable consideration of Congress. It would be virtually to postpone their ultimate payment to a distant day, when the policy of the Government should be to redeem them from year to year, as the means of the Treasury will justify. A public debt which remains in the form of treasury notes, can always be redeemed without endangering the successful operations of the department. When, on the contrary, there shall be an excess of revenue over expenditures it can be easily placed to the redemption of the Treasury notes. For the power of retaining the revenue, should the future receipts from any source, exceed the wants of the department, authorized, as it now is, to apply the money can be anticipated without the payment of any premium, which will inevitably be the case with United States stock.

Contemplating the gradual redemption of these notes and being opposed to the policy of adding the sum of twenty millions to the permanent debt, he recommends, however, a modification for extending the operation of the Treasury note act from one to two years.

Senator Bigler intends early next week to bring forward a bankrupt bill, and sustain it by a speech. It is similar in its details to the one passed by the Committee on Judiciary at the last session.

Although there is much pressure of public business some of the prominent friends of the measure in both Houses, if this proceeded, think the bill can be passed, provided the Administration Act with zeal. It is claimed that the Senate, taken exception to interfering with the Tariff, gives the bill additional strength.

Taking into view the embarrassments of the Treasury, and the near approach of the termination of Congress, the Senate Committee on Military Affairs decided, today, to lay the whole subject of the establishment of a national foundry over till next Congress.

Lord Napier has formally accepted the invitation of a complimentary ball on the 27th inst. The President, Cabinet, Diplomatic corps and citizens are invited guests.

The name of the Rev. John Cummins was omitted in the recent published rule on suspending the rules to enable Mr. Kilgore to introduce his resolution supplementary of the reopening of the African Slave-trade. He voted in the affirmative.

Our Washington Correspondence.

THE DISORGANIZATION OF THE DEMOCRACY—THE PRESIDENT, SECRETARY COBB AND THE TARIFF—THE JUDGE IRWIN VACANCY—POPULATION OF OREGON, &C.

WASHINGTON, Wednesday, Feb. 2, 1859.

There is a very general feeling of despondency among the Democracy in Congress, in consequence of the utter disorganization of their Party. The fact is admitted freely, and with a despairing sort of don't-care-whether-school-keeps-or-not air that bodes little hope for improvement. Not a few of those who participated in the caucus proceedings, last night, suggest to-day the propriety of an inquiry whether they have party votes enough in the House to carry any measure whatever. Disgust with the Executive, and despair of themselves, may be truly denominated the ruling sentiment in the Democracy of Congress now-a-days. The example of disorganization presented by the hostilities attitude which the President and his Chief Clerk for the Treasury Department maintain toward each other, naturally encourages rebellion all over the Democratic camp; and so there is neither harmony nor attempt at harmony upon the Tariff question or anything else. If the President and the several members of his Cabinet can divide, and each "go it alone," why shouldn't the M. C.'s? Why should the latter unite when the former are divided? The impossibility of harmony has become so apparent, that scarce any one thinks of making further effort to secure it.

Mr. BUCHANAN is felicitating himself upon the expectation that Mr. COBB is softening, and will to-morrow recommend to Congress such revision of the tariff as will secure sufficient revenue for the support of the Government and satisfy Pennsylvania. He unquestionably stated to-day that such would be the Secretary's course. I believe he is deemed to be disappointed. Mr. COBB has been associated with Mr. BUCHANAN to little purpose if he is sufficiently intimidated by any thing that venerable sage has done or threatened to think of yielding at this hour to the convictions of the man he has so long defied. Mr. COBB must see that such a step is sure to involve himself in political ruin, because it will array against him at once the great body of Southern men, among whom even now he is very unpopular, and only tolerated because of his faithfulness to the South on the tariff issue. Let him recede a hair line upon that point, and he is gone; his head would be instantly demanded by those who now commend his course; and the President, whom moral cowardice betrayed WALKER and STANTON in Kansas, and led him to attempt to force the Lecompton iniquity, at the dictation of his Southern fire-eating correspondents, will not dare refuse obedience. Mr. COBB understands all this, and will be apt to decide that it is much safer to trust the indecision and want of nerve of Mr. BUCHANAN, than to brave the hostility of his Southern friends. The former might save him and probably would, while the latter is sure death. So reason the shrewd ones of all parties.

No appointment has yet been made to fill the vacancy occasioned by the resignation of Judge IRWIN. The Pennsylvania delegation have united without distinction of party in recommending the Hon. WILLIAM MCCANDLESS, who unquestionably is abundantly qualified for the place, and who is the unanimous choice of the Bar of the District. Why the President hesitates to appoint him is matter of much speculation. With all the high moral worth and the exceeding fitness of Mr. MCCANDLESS for the place, there is one objection to his appointment which will probably prove fatal to his success; he has been for twenty-five years an ardent, faithful, devoted friend to JAMES BUCHANAN, in season and out of season,—and to hope therefore that his claims to the Judgeship can be recognized, is to anticipate an act of such character as the President never was guilty of. To be his faithful friend is to secure his certain neglect and repudiation. His favors are reserved for those who abuse him.

Not long ago General LANE, of Oregon, took issue with some statements of mine in regard to the population of Oregon, and presented a delusive, sophistical estimate and argument to show that the Territory has a population of ninety thousand, instead of the forty or fifty thousand which I estimated for her. I desire now to call the attention of Congress and the public to the letter of your Oregon City Correspondent, published yesterday, in which the census taken recently by the County Assessors shows the population to be *less than forty-five thousand!* Some other suggestions of the correspondent are worthy of attention, especially his declaration that if the proposition for a State Government were now to be submitted to the popular vote, it would be overwhelmingly negatived. Surely it would be better to let Oregon wait a little longer, as there seems to be not the least occasion for admitting her into the Union except in order to make places for a couple of Senators, who think they would grace the Senate Chamber, but who, it seems, would probably be elected to stay at home if the choice was again to be made.

The Washington *Union* seems to be acquiring a chronic disability to speak the truth when falsehood will serve a temporary purpose. To-day they base a vulgar attack on Mr. BURLINGAME, of Massachusetts, upon the pretence that he had asserted that the organ was in favor of the French Spoliation bill—while their own report of the proceedings of the House shows the falsity of their pretence. The *Union's* purpose is accomplished, however, in getting the misstatement once before the public, for they never think of retraction. Your correspondent convicted them of two distinct and unequivocal misstatements, in regard to one of his paragraphs, not long since; but of course the *Union* editors had neither the honor nor the manliness to make the correction before their readers, among whom they had circulated their slanders.

Wonder if DAVID RICHARDS didn't sell our venerable Chief-Magistrate, to-day, when he told him that he and BUTTERWORTH had concluded that the President was right in keeping Democrats in office,—and that it was the best possible thing to be done for the Democratic Party. Mr. BUCHANAN evidently nearly shed tears of joy on learning that this knotty question of the New-York Collectorship was settling itself amicably at last. RICHARDS should have added the reason for the suspension of hostilities, and informed Mr. BUCHANAN that he and Mr. BUTTERWORTH, after due consultation and prayerful consideration, had concluded that if Mr. SCHELL remained in office until the end of his term, the Dickinson Party would be so effectually used up, by means of the blunders and errors of omission and commission on the part of their Collector, as to be too weak to give the party any trouble. Cruel DEAN! S.

XXXVth Congress.—Second Session.

SENATE.... WASHINGTON, Thursday, Feb. 3.

Mr. WRIGHT, of New-Jersey, presented the memorial of MONA & BRETHERS, and NAVARRO and NAVARRO & Co., who are about to establish a line of steamers between New-York and Havana, offering to carry the mail at $1 50 per mile bi-monthly, or offener at the same rate. Referred to the Post-Office Committee.

Mr. SEWARD, of New-York, presented the memorial of the Legislature of New-York, for the improvement of lakes and harbors.

In making this communication, Mr. SEWARD said:

"The Senators from New-York are charged by the authorities of that State to submit to Congress a communication of high importance concerning the reciprocal duties of New-York and the United States to the whole country, on the subject of the internal navigation which constitutes the basis equally of our domestic and foreign commerce. In the year 1811, only twenty-two years after the reorganization of the American Union under the Federal Constitution, New-York, by a delegation of two of her most honored and eminent statesmen, appeared here and addressed Congress on the same great subject, appealing to the National Legislature to construct, or to lend to that State her aid in constructing an artificial channel through her borders by which to connect the ocean navigation with the navigation of the great inland seas.

It is not wonderful that the appeal was disregarded, since even THOMAS JEFFERSON, who seemed almost inspired with prophetic foresight of the working of our great political system, pronounced the project premature by a period of at least one hundred years. Less, however, than half that probatory term has elapsed, and New-York comes before Congress again to tell them that, unaided and alone, she has executed the great enterprise, how she has performed it, what are its national benefits, and to invoke now only that small measure of acceptance and adoption which is necessary to a full and perfect fruition of those benefits.

New-York, beginning in 1817, just after the second war with Great Britain, completed, in 1825, a navigable channel 40 feet wide and 4 feet deep, from Albany, at the head of tide-water on the Hudson, to Oswego, on the shore of Lake Ontario, and to Buffalo, at the foot of Lake Erie. The work, executed not in conformity to the great design, but in compliance with the exigencies of her financial condition, proved quite inadequate, and she had scarcely brought the narrow channel into use before she began its enlargement. Practically that work is also completed, and steam vessels of 240 tons burden pass, without need of transshipment of cargo, equally from the Lower Mississippi and from Lake Superior, to the City of New-York, the central seat of American commerce, through the Erie Canal, 350 miles long, 7 feet deep, and 70 feet wide, built by that State alone from her own unaided resources, at a cost of $40,000,000.

New-York, by the memorial we now present, seeks to propitiate Congress by declaring, as, indeed, it may with the utmost truth, that although she is not really in a literal sense a beneficiary of the Federal Union, she has generally yielded a liberal support to the policy of extending aid by that Government to internal improvements of other States. She respectfully asks Congress to consider that her Canal, although local, constitutes in fact only a link in a chain of inland national navigation, extended near 1,000 miles from the Atlantic coast into the depths of the Continent; that it opens to the general commerce of the United States a new shore line on the St. Lawrence and the lakes of more than 4,000 miles, equal to our whole Atlantic water line with all its indentations; that the lake navigation is in no sense local or sectional; that it has all been subjected by the Federal Government to the revenue and the admiralty systems of the Union, and has always been in the time of war the theatre of most brilliant and effective naval triumphs to the establishment of our true political independence; that this inland navigation is the basis of the commercial aggrandizement of the City of New-York, which has already poured into the national treasury within the twenty years since the Erie Canal was brought into effectual operation, the immense sum of $[illegible], that while that canal annually bears freight of the aggregate value of $[illegible], it is the basis of annual revenue to the United States of more than $60,000,000. The region tributary to the Erie Canal is continually enlarging, and it is already drawing freights of cotton from the Lower Mississippi, while its trade is augmented by every stroke of the axe in the northwestern Provinces of British America. New-York, in review of the facts, declares that her Erie Canal is a work superior in its national operation to any artificial channel of navigation ever constructed in any country, in ancient or modern times, save only the grand canal of China.

The object of the State, in making this communication, is to make it the foundation of an appeal to Congress to provide for the security and efficiency of the harbors of the United States at the two terminal of the Erie Canal, on Lake Ontario and Lake Erie, and of such other harbors as are necessarily used in connection with the inland system of navigation through the great lakes.

Finally, New-York enforces this claim by the statement that the freights which she has transported on her great canal, to and from regions beyond her own borders, within the last twenty years, exceeded twelve hundred millions of dollars, and that within the next twenty years it is morally certain that the freights to be carried through the State channel will exceed double that immense sum."

Mr. SEWARD, in his remarks in support of the memorial, claimed that it was one of the most able state papers ever laid before the Senate.

The memorial was read and referred.

Mr. BAYARD, from the Judiciary Committee, reported adversely to the claims of Messrs. LANE and MACARTHY as Senators from Indiana, saying that he would call up the case on Monday.

Mr. SEWARD here moved that Messrs. LANE and MCCARTHY be admitted on the floor during the discussion. Laid over.

Mr. HOUSTON, of Texas, introduced a bill to unite the two Judicial Districts of Texas. The apparent object of the bill is to remove Judge WATSON. In presenting it Mr. HOUSTON took occasion to reply to those members of the House of Representatives who had accused the people of Texas of unusual clamor against Judge WATSON. He proceeded to reveal an alleged conspiracy, of which WATSON was an actual member. The object of said conspiracy, in which New-Yorkers were chiefly implicated, was to obtain large portions of the public domain of the Republic of Texas. His speech was elaborate and an hour and a half in length.

Mr. COLLAMER presented the minority report of the Judiciary Committee in reference to the Indiana Senators.

Mr. WILSON introduced a bill to authorize the Attorney-General to represent the United States in the proceedings in Equity, now pending in the Supreme Court, between Massachusetts and Rhode Island. Referred to the Judiciary Committee.

Mr. GWIN moved to reconsider the vote by which the Agricultural College bill was yesterday recommitted, which was carried by 27 against 26.

The bill was then re-discussed and amended, when its further consideration was postponed until Monday, that Mr. CLAY may speak on it, he thinking it a monstrous, iniquitous, and dangerous measure.

The Indian Appropriation bill was then taken up, debated and passed. Executive session. Adjourned.

HOUSE OF REPRESENTATIVES.

WASHINGTON, Thursday, Feb. 3.

On motion of Mr. BRAGGIN, of TEXAS, it was resolved that the Committee on Judiciary be instructed to inquire into the expediency of reporting a bill to define and provide for the punishment of polygamy in the Territories of the United States, and restrain the people and authorities therein from interference with the Federal Judiciary.

The House passed with amendments the Senate bill relative to the New-York Indian reservation in Kansas. It sets apart 320 acres for each individual Indian who removed from New-York to the reservation assigned them under the treaty of 1838. The Indians are to have a year within which to make their selections, and preemptions are to be secured from the date of settlement. The money derived from the sale of lands other than those selected by the Indians is to be paid into the Treasury for their benefit.

On motion of Mr. GEO. TAYLOR, of New-York, the Select Committee to examine the accounts of Mr. STANAN, the late Superintendent of Public Printing, was authorized to sit during the session of the House.

Mr. FAULKNER, of Virginia, from the Military Committee, reported back the bill for the establishment of a branch of the Military Academy at the Hermitage, with the recommendation that it do not pass.

Mr. FAULKNER reported a bill to promote the efficiency of the Army and Marine corps, by retiring disabled or infirm officers.

Mr. FAULKNER also reported the Senate bill, with an amendment, granting the right of way through the Fort Gratiot Military Reservation to Michigan for railroad purposes, with the privilege of erecting depôts and workshops. Passed.

Mr. VENABLE reported a resolution instructing the Committee on Printing to inquire into the expediency of devising some plan by which the President's Messages and accompanying documents can be earlier printed. He said that although Congress had been in session two months, such documents as are essential to the business of the Committee on Military Affairs are not yet printed.

Mr. LECOMPTE, of Va., offered an amendment, which was agreed to, that further inquiry be made whether pay for double type setting may not be avoided, where the work is executed by the same person.

Mr. HOUSTON, of Alabama, remarked that the President's Message and accompanying documents make four volumes, when three-fourths of the whole matter was worthless.

The resolution was adopted.

The House went into Committee on the Executive, Legislative and Judicial Appropriation bill, and an earnest debate followed on an item for the reduction the appropriation for boxes. The question of economy was involved.

Mr. JOHN COCHRANE, of New-York, said the time thus consumed was worth very much more than these boxes. Gentlemen ought to confine themselves to weightier matters of retrenchment.

Mr. STANTON, of Ohio, replied he would strike down the Army to the peace establishment of 1820, strike down the Navy, and curtail the Post-Office expenses, &c.

Mr. COCHRANE responded that that would deform, and not reform, the public service.

Mr. CRAWFORD, of Georgia, said that there were two boxes for each member, in which to send home public documents.

Mr. TRIPPE, of Georgia, remarked that he had received only two boxes, when he was entitled to eight. He would make a present of the other six to the Government. [Laughter.]

The five thousand dollars appropriated for the boxes was stricken out.

Other small items of the House contingent expenses, such as saddle horses, wagons, etc., were discussed.

Mr. MILLSON, of Virginia, reminded gentlemen that at the rate at which they have been proceeding, it would require fourteen days to dispose of this bill. Let them trust the Committee of Ways and Means for the details and devote themselves to larger objects.

Mr. MOORE, of Alabama, thought that because these items were small was no reason why retrenchment should not be made.

Mr. WASHBURN, of Maine, spoke of the useless consumption of time, and suggested important reforms.

Mr. HARRIS, of New-York, would vote for an additional number of newspapers for distribution among members, for he was certain that more intelligence was required than had been exhibited to-day, for the whole time had been expended in buncombe speeches. [Laughter.] If he could have his way, he would incorporate an amendment to prevent laughter in reference to such a bill as this.

An amendment to strike out over twelve thousand dollars for newspapers for the use of members was rejected.

Mr. CLEMENS, of Alabama, spoke against the present authorized system of reporting the debates. It acted like an embargo or prohibition on all legitimate discussion, and furnished material for books, which nobody reads.

Mr. NUGENT, of Ohio, was for excluding from the *Congressional Globe* all irrelevant speeches or essays, and adverted to existing oratorical abuses.

The Committee rose without coming to any conclusion on the bill, and the House adjourned.

United States Supreme Court.

WASHINGTON, Thursday, Feb. 3.

No. 77.—Leslie Combs *vs.* Andrew Hodges, *et al.* Appeal from the Circuit Court of the United States for the District of Columbia. Justice CAMPBELL delivered the opinion of the Court, reversing the decree of said Court, with costs, and remanding the cause for further proceedings.

No. 46.—Henry Hill *vs.* Caleb B. Smith *et al.* Error to the Circuit Court of the United States for the District of Indiana. Justice GRIER delivered the opinion of the Court, reversing the judgment with costs, and remanding the cause for further proceedings.

No. 2.—Rufus Allen *et al.*, *vs.* Henry L. Newburg, citizens of the Canadas. *Pending.* Appeal from the District Court of the United States for Wisconsin. Justice NELSON delivered the opinion of the Court affirming the decree with costs.

No. 39.—George Smith *vs.* John J. Orton. Appeal from the District Court of the United States for Wisconsin. Justice CAMPBELL delivered the opinion of the Court reversing the decree with costs and remanding the cause for further proceedings.

No. 30.—The Owners of the brig *James Gray* *vs.* The Owners of the ship *John Fraser* and steamer *General Clinch*. Appeal from the Circuit Court of the United States for the District of South Carolina. Justice TANEY delivered the opinion of the Court reversing the decree with costs, and remanding the cause for further proceedings.

No. 60.—The People of the State of New-York, ex relation of Ann Cutler *et al.* *vs.* Edgar C. DeWitt. Argument commenced for plaintiffs and continued for defendants.

The Overland California Mail.

ANOTHER MURDER ATTEMPTED—RUMORED WHOLESALE POISONING, &C.

ST. LOUIS, Thursday, Feb. 3.

The Overland Mail brings San Francisco dates of the 10th ult. The trip was made in twenty-three days, including twenty-two hours detention.

PAUL C. SMOKE was killed in Santa Clara County, California, on the 6th, by THOMAS SEALS. There was great excitement in consequence, and the military had to be called out to protect the prisoner, who was conveyed to prison at San José.

Rumors prevailed at San Francisco that 200 prisoners in the Penitentiary had been accidentally poisoned by the use of some chemical mixed in the flour. There was doubtless some truth in the rumor, but the matter was greatly exaggerated.

The sloop-of-war *Vandalia* had left for Guyamas to relieve the *St. Marys*.

The Probate Judge of Carson Valley had published a card declaring his intention to perform the duties of his office without fear or favor from any man. A collision between him and the Anti-Mormons was regarded as inevitable.

General KEARNY was still prosecuting the war against the Indians in the north with great success. His troops had killed quite a number and taken over 200 prisoners.

News from Kansas.

LEAVENWORTH, Thursday, Feb. 3.

"Osawatomie" BROWN, who had been pursued and surrounded at Eureka by the Deputy Marshal and posse, succeeded in making his escape on Monday into Nebraska. A small detachment of troops, sent by Colonel SUMNER to aid the capture of BROWN, returned on hearing of his escape.

Highly flattering accounts of the Kansas Gold Mines continue to be received. A rich quartz vein had been discovered at Ralston's Fork, 12 miles from Auraria and shot-gold abounds in several localities.

News from New-Mexico.

ST. LOUIS, Thursday, Feb. 3.

The Fort Defiance dates by the Santa Fé mail are to Dec. 21. They say that the Navajo Indians acknowledge losing 200 lives, 20,500 sheep and horses, the destruction of 1,000 hats and an immense quantity of grain, altogether valued at upwards of $100,000, during the late war.

Mr. VOSE, in a letter to the Santa Fé *Gazette*, intimates that there is a disposition to deal too harshly with these Indians, and says that if certain terms are exacted it will turn them from the pursuits of industry and agriculture, by which they now support a whole nation of 12,000 souls and sustain 250,000 sheep and 60,000 horses, and make them robbers and plunderers.

Connecticut Politics.

DOUGLAS IN THE ASCENDANT—THE ADMINISTRATION DENOUNCED.

HARTFORD, Conn., Thursday, Feb. 3.

The Democrats held a caucus here to-night to appoint delegates to their several Conventions. Over four hundred were in attendance, and there was a happy and exciting time. The Douglas delegates were elected by a vote of nearly five to one, and strong resolutions nominating DOUGLAS for President were passed almost unanimously. JULIUS L. STRONG, Esq., one of the delegates to the State Convention, denounced the Administration in bitter terms.

Nova Scotia Legislature.

HALIFAX, Thursday, Feb. 3.

The Legislature was opened to-day. The Governor's speech was brief, and of an unimportant character. It refers to a federal union of the Provinces, and an inter-colonial railway, notices a slight deficiency in the revenue, and promises several useful measures.

The State Medical Society.

ALBANY, Wednesday, Feb. 2.

The State Medical Society have elected the following officers for the ensuing year:

President—Professor FORDYCE BARKER, of New-York.
Vice-President—DANIEL T. JONES, of Onondaga.
Secretary—SYLVESTER D. WILLARD, of Albany.
Treasurer—JOHN V. P. QUACKENBOSS, of Albany.

The Charleston Races.

CHARLESTON, Thursday, Feb. 3.

Gazelle won the first race, to-day, and *Congaree* the second. The mile-and-a-quarter race was won by *Pee Dee*.

Fires.

HARTFORD, Conn., Thursday, Feb. 3.

GRAY'S machine shops, in Bristol, were destroyed by fire this morning. Loss $12,000.

The Exchange Hotel in this city was also burnt this morning. Most of the contents was saved, but the building was entirely destroyed. In it were a shoe store and a fruit store, but the goods in them were mostly saved. The insurance is nearly $7,500, which will nearly cover the loss.

Weather Reports.

BOSTON, Thursday, Feb. 3—9 A. M.

BOSTON.—We have four inches of snow and it is still falling, but there are indications of a change to rain.

ROUSE'S POINT, N. Y.—Snowing hard.

MONTREAL, Canada.—Thick snow storm. Ther. 23.

The snow storm is reported as extending generally over Vermont and New-Hampshire.

Keeney, the Forger.

NEW-LONDON, Conn., Thursday, Feb. 3.

KEENEY, the forger, was sentenced in the Superior Court to-day to State Prison for five years.

Non-Arrival of the Kangaroo and Asia.

SANDY HOOK, Thursday, Feb. 3—11 P. M.

There are yet no signs of the expected steamers *Kangaroo* or *Asia*. The weather is cloudy, with a fine mist. Wind fresh from N. N. W.

The British Bark Vernon Ashore.

Boston, Thursday, Feb. 3.

The British bark *Vernon* from Messina for Boston, went ashore on Lynn Beach last night.

A MURDERER'S PETITION.—Last September one WILLARD CLARK was tried at New-Haven for the murder of RICHARD W. WEBBY, but was acquitted on the ground of insanity. Since the trial he has been confined in the County jail. On the 21 of February he petitioned the Court for a release, on the plea that he had recovered his reason. A long letter, addressed to his counsel, was read in Court. He acknowledges the commission of the murder, but claims that a single act should not "outweigh twenty years of residence in peace and harmlessness." He says his troubles have arisen in consequence of an ignorance of the law in his case, and adds this frank expression of his views:

My enemies have had it all their own way, and the majority of men are too lazy to think any matter out for themselves, but allow themselves to be carried away by the side that apparently has the most backers, or, like a flock of sheep, are always ready to follow blindly wherever the old bell-weather leads, whether into the slush or into the pit. And I think you can foresee that the moment I am brought fairly before the Court people will perceive at once that I ought to be discharged; will be surprised that I have staid here so long; and that the prejudices against me will vanish, or be ashamed to show itself. Very likely the States Attorney will make a violent assault upon me, unsupported by any evidence, but I think that will not appal a man of your prognostic. I feel that the time that is passing over my head now would be of vast importance towards enabling me to repay the debt your fee will subject me to. I suppose I should feel compelled to go to my brother's in the West by Spring, and want to, and believe I could pay that before I went, if I were at liberty now. Please post me up as soon as convenient.

Yours truly, WILLARD CLARK.

A girl of thirteen years of age recently forsook her distracted "parients," at Gardner, Me., and was married before they could prevent it.

ACADEMY OF MEDICINE.

THE WHITNEY CASE AGAIN.

EXCITED DEBATE.

The Question Settled—Drs. Green, Mott and Beales are Exonerated from all Charges Affecting their Professional Reputation—Mr. Whitney is Declared to have Died because of no Improper Treatment, but from a Complication of Diseases.

The Academy of Medicine met last Wednesday evening, at 7 o'clock, in the small Chapel of the University, in accordance with the provisions of the new Constitution, which require that henceforth all the stated meetings shall take place on the first and third Wednesdays of every month. The attendance of members was large; that of non-members, unprecedentedly so.

Dr. WILSON, the newly-elected President, occupied the Chair.

When the Secretary had read the minutes of the previous meeting, and the question as to their approval was being put from the Chair,

Dr. VALENTINE MOTT rose and said: If I am not mistaken, there is one remark there which, perhaps, on my part, may call for a little explanation.

The PRESIDENT—Is it reported correctly, Doctor, as the minutes?

Dr. V. MOTT—It is in relation to my having stated to Dr. GRANT that I wished that *post-mortem* examination (in the Whitney case) withheld from the public. It is true, I wished the whole to be withheld from the public, and that everything should be kept out of the papers—and even out of the Academy, if possible. I would only state that I did say that, I know, to Dr. GRANT; and I said so expressly to him, after the *post-mortem*, and in my own house; for he called on me to know the particulars of it, and to ask me to make him a certified copy, and I did so forthwith. I only wish to be understood by the Academy to say that I did request that, as I have stated. Dr. GRANT can answer for himself.

The PRESIDENT—Doctor, excuse me. That is out of order.

Dr. MOTT—Well, if it is, I will submit. I thought it was in order to correct the minutes.

The PRESIDENT—If there is any mistake in the minutes, Doctor, it will be corrected. Is there any motion to amend the minutes?

No such motion being made, the minutes were approved.

Dr. MOTT—May I now amend them, or is it improper?

The PRESIDENT—It will be in order directly.

The Academy then proceeded to dispose of the business as it came up, according to the established order.

The resignation of Dr. MCNULTY, as Chairman of the Special Committee on Public Health, was accepted, and it was resolved, on his suggestion, that a new Committee of five be appointed to protect and promote the passage of the bill now before the Legislature for the reorganization of the Health Department of this City.

Dr. GRANT avowed that that bill had been framed by him, and said that the Sensorial Committee to which it had been referred was ready to report favorably on it.

Unfinished business was now declared to be in order.

Dr. MOTT again rose, and said he did so merely for the purpose of having the minutes corrected, as he thought they ought to be. Dr. GRANT, he repeated, had called on him at his house for the purpose of knowing what the *post-mortem* appearances in Mr. WHITNEY'S case were. He (Dr. M.) told him. Dr. GRANT requested of him a copy of the statement, or an account of the *post-mortem*, which he promised to him, and he faithfully performed that promise. He dare say that he (Dr. M.) said at the time that he wished that not to go into the papers, and that he thought if any use was to be made of that or of anything connected with the case, the Academy was the appropriate tribunal to go before. He knew perfectly well that he had a motive in making that request, and he knew that he himself requested Dr. GRANT, at that moment, not to have anything in the papers in relation to this distressing case, because he believed then, and he still believed, that if no information had been committed in that respect, this case would have passed away *sub silentio*, in the course of a few days. But it had gone out, and as it had gone out he wished the minutes to be so corrected as to show that Dr. GRANT had called on him, and that he (Dr. M.) had given him the *post-mortem* appearances. Whenever the appropriate time arrived, he should have something further to communicate on the subject.

The PRESIDENT—The subject is now in order.

Dr. MOTT—Is it in order without adopting a motion to take the matter from the table?

A member moved that Dr. MOTT be requested to proceed.

Dr. MOTT—If there is any other business that will not occupy the whole evening, perhaps you had better call it up, for the reason that I see Dr. BEALES is not here, and, as he is a *participe criminis* in the matter, I should like him to be present.

In accordance with Dr. MOTT'S wishes, the matter under the head of unfinished business was temporarily postponed, and, in the meantime,

Dr. O'REILLY read a paper.

A resolution was adopted referring to the Council, with power, so much of the President's address as relates to the establishment of a bulletin of the Academy.

Dr. BEALES having arrived in the interim, the President announced that Dr. MOTT'S proposed remarks were now in order. The matter was accordingly taken from the table, by resolution. Dr. MOTT then said: "Mr. President, as verbal communications are apt to be misconstrued, and sometimes misrepresented, I thought it would be better to commit to writing what I have to say on this distressing subject."

He proceeded to read as follows:

GENTLEMEN: I have endeavored through life to make it my rule of action, "To do unto others as I would that others should do unto me." This desire, together with my personal regard for Dr. GREEN, with whom I have been on terms of much friendly intercourse and correspondence for years, will explain, and I trust, excuse to the public my unwillingness to give an opinion in the late Mr. WHITNEY'S case, other than could be inferred from my *post-mortem* statement read at the last meeting of the Academy.

Nothing but a cause of justice to myself and others connected in this somewhat affair induces me now to give to the Academy my entire and unbiased view on the subject.

At the same time I avail myself of the opportunity to contradict the untruths so industriously circulated by Dr. GREEN'S friends with regard to Dr. BEALES, my son and myself.

Forbearance, beyond a certain point, ceases to be a virtue, and at this point I feel we have arrived. It therefore becomes my duty to defend my character against the unjust inferences drawn, and the false assertions made, by the parties above alluded to.

In the first place, then, because Dr. GREEN was not called in to assist in the treatment of the patient during his illness, or invited to witness the post mortem, it is inferred that Dr. BEALES and Dr. MOTT prevented it. And it is furthermore stated that one member of the family desired his presence. The inference and the assertion are alike untrue, as the accompanying letter from the family will prove.

The excited feelings of the family were such as to preclude the possibility of urging Dr. GREEN'S attendance. Nor can it for a moment be imagined that such a wish could have been entertained by one of the immediate relatives of a man who throughout his illness to the day of his death persisted that he was suffering and dying from the professional treatment of Dr. GREEN.

To say that a correct diagnosis was not made is idle and ridiculous; and the assertion that had the abscess been opened his life might have been spared, is equally unfounded. It was evident that some lesion or injury did exist, to account for the extensive emphysema, but where that injury was no man could tell until after death. The tumefaction, from the extensive diffusion of air through the cellular tissue, rendered any satisfactory inspection of the throat within, or the neck without, impracticable.

The abscess or rather cavity contained very little "pus" at the post-mortem—enough only, had the patient's life been prolonged, to have aided in throwing off the large quantity of sloughy, cellular membrane, which hung like "wetted tow" within the cavity, and with which it was mostly filled. This, with the lacerated coming into the pharynx, and the serious lesion of the left lung, would lead to the belief that some irritating substance or fluid had been introduced.

With regard to the situation of the abscess or cavity, I again assert it was such as to forbid the idea being entertained by any one acquainted with surgical anatomy that it could have been seen by any examination from within the mouth, or felt externally by the most careful manipulation upon the neck. Of these facts surely those who were in constant attendance on the case ought to be the best judges.

I feel as if the experience derived from 53 years of practice, together with my duties as Professor of Surgery during that time, ought at least to entitle me to the confidence of a public under whose care and in whose service my professional life has been spent; and I am willing to leave it to that public to decide, from their knowledge of me, whether I am capable of drawing up a *post

[illegible] "I have employed [illegible] in cases of chronic [illegible] whether tuberculous or tubercular, and very [illegible] with marked success."

[illegible] commencement of the laryngeal symptoms, [illegible] of the crystals of the nitrate of silver, varying [illegible] from ten grains to half a drachm to [illegible] of distilled water, passed by means of the [illegible] recommended by Dr. Gazzan into the [illegible] larynx, is often productive of great relief. I have known the relief remained, the irritable [illegible] have been lessened and difficulty of swallowing almost entirely by it; indeed, I think we might almost speak of its curative effects—so far, at least, as the larynx is concerned, in some very early cases." (Op. Citat. pp. 226, 227.)

In Prof. Bennett's work on Consumption, he expresses a decided opinion in favor of the topical use of nitrate of silver in the treatment of tuberculosis:

"In all cases of tubercular deposit," he says, "there occurs in the immediate vicinity of the exudation more or less of an inflammatory action, in which all the adjacent structures are involved. The bronchial membrane and the pulmonary parenchyma become at once congested, and subsequently inflamed. The terminal extremities of the bronchi, says Prof. Bennett, are among the first structures affected; and in the tuberculous exudation, all the appearances and commencements of chronic bronchitis are produced, and consecutively going on to the progress of the case, [illegible] the tubercles. The great problem is, how to cut off the tubercle, on the one hand, it is a disease of a local character, and consequently, and consequently a general invigorating and supporting treatment, on the other, it is accompanied by local inflammation, which demands an antiphlogistic and lowering practice." (Op. Citat. p. 68.)

It is to meet this last indication, to reduce the local inflammatory action in the immediate vicinity of the tubercle—an action which, if continued, will not only effectually prevent the disintegration and elimination of the tubercle, mass already formed, but will tend to prevent the mass—that application of the nitrate of silver solution to the congested and inflamed mucous membrane, are advised to early as well as in advanced tuberculosis.

"In the treatment of acute laryngitis," says Dr. Hayward, "the topical application of a solution of the nitrate of silver is peculiarly adapted to employed with great advantage; indeed, unaided, it will not unfrequently cut the disease."

"But it is in the chronic form of laryngitis," Dr. Hayward continues, "that this treatment is remarkably useful. Many such cases improve rapidly under local treatment applied to the larynx and trachea, which, if neglected for months, or it may be for years, will subsequently tend to permanent changes."

In this connection, Dr. Hayward relates some most interesting cases of chronic laryngitis, attended with hoarseness, cough, constriction, "expectoration streaked with blood," difficulty of breathing, night sweats, and most of the ordinary symptoms of phthisis—all of which, he says, were promptly and permanently relieved by a solution of nitrate of silver of the ordinary strength, applied to the larynx and trachea. With regard to the treatment of tubercular laryngitis, Dr. Hayward remarks, "I know of no means so capable of arresting and removing it, as treating the ulceration with a solution of nitrate of silver." (Op. Citat. pp. 18, 31, 36.)

Professor Watson, of the University of Glasgow, says in his work on Topical Medication: "In the treatment of chronic disease of the laryngeal mucous membrane, I place my chief reliance on topical application of the parts affected." And in the employment of local treatment in tuberculosis, he has recorded several most instructive cases, in which the larynx was advantageously treated by topical means, in both tuberculous and pulmonary phthisis.

In combination with, or to be followed by, appropriate general remedies, Dr. Watson urges the importance of the use of applications of nitrate of silver to the larynx, in all those incipient cases of phthisis, in which the cough is caused by actual laryngitis, by the irritation produced by the passage of the dry sputum, or by secondary nervous irritation of the larynx. "In treating the larynx, with a view of diminishing the cough, the physician is not to be looked upon as irrational, but, on the contrary, as aiming his remedial measures at the very source of much of the distress of the patient and of the fatal progress of the disease." (Op. Citat. pp. 68, 168.)

No unprejudiced person can read the testimony embodied in the cases reported by Dr. Watson, without having the conviction forced upon him, that in many of these instances of early tuberculosis, an arrestment of the pulmonary disease was brought about by the measures adopted. "Unfortunately," he remarks, "the tendency to hereditary disease still remains in the constitution, though the local manifestation had ceased to exist." "Formerly there was positive evidence of an actual consumption; now, there is no such evidence, but, on the contrary, all the signs and symptoms of perfect health."

Dr. Horace Green, in his work on the Medication of the Larynx and Trachea, says: "I had so frequently found, in the treatment of local disease and local complications, that many remedies were far more efficacious when applied immediately to the part affected, or to its vicinity, than at a distance, that I was glad to learn that a sponge, loaded with a solution of the nitrate of silver, and affixed to a probang, could, not only without injury, but with manifest advantage, be passed through the glottis and the larynx, down into the trachea." (Op. Citat., p. 23.) "In chronic inflammations of the larynx, and of the upper portion of the trachea, the solution of the nitrate of silver," he observes, "has, in my hands, as in others, been very useful in bringing the disease to a conclusion, and where disease not been accomplished by reason of the extent of the ulceration upon incurable disease of the lungs, the cough has been materially affected very considerable [illegible] the cough less violent and frequent, [illegible] much of the tickling and uneasiness in the upper portion of the larynx."

[illegible] decidedly in favor of the employment of the nitrate of silver in the treatment of that cough and irritation of the glottis, which are dependent upon the presence of tubercles in the lungs. "Much comfort and benefit," he says, "have been derived from its use; both when the tubercles have been [illegible], or when they have become softened. The presence of undoubted cavities in the lungs, the presence of tubercles, and the expulsion of their debris, have not prevented this application from being decidedly useful." (Op. citat., p. 5.)

Prof. Robert B. Todd, Physician to King's College, Hospital, London, who has had much experience in the treatment of laryngeal, bronchial, and pulmonary diseases, by topical medication, has embodied in his "Clinical Lectures," recently published in the London Medical Times and Gazette, some of his views, and recorded his experience in relation to this subject. In the treatment of these affections, he urges and recommends the local application of a solution of nitrate of silver, (half a drachm to the ounce of water,) by means of a probang thrust behind the epiglottis down to the glottis, on the plan of Dr. Horace Green, of New-York.

"I could tell," says Dr. Todd, "of numerous instances of coughs of the most troublesome kind, and of long duration, that had resisted all the ordinary cough medicines, and which had yielded to three or four applications of the nitrate of silver." (London Medical Times and Gazette, No. 128, p. 587.)

And finally, Prof. Bennett closes his valuable work on the pathology and treatment of pulmonary tuberculosis by the following practical conclusions:

"1. That not unfrequently disease, entirely seated in the pharynx or larynx, are mistaken for pulmonary tuberculosis.

"2. That even when tuberculosis exists, many of the symptoms are not to be much owing to disease in the lung as to the pharyngeal and laryngeal complications.

"3. That a local treatment may not only remove or alleviate these complications, but that in conjunction with the general remedies, it tends in a marked manner to induce arrestment of the pulmonary disease." (Op. citat., p. 145.)

But, Mr. President, this is not a little of the facts and observations, in favor of topical medication, that might be gathered from the profession elsewhere, in this country, and in Europe. I have spoken before the Academy of its employment in France, although more extensively than in this country, and of the efforts of such men as Velpeau, Piorry, Dr. Paul and others of the Imperial Academy, to find some member of the profession in France, for whom they might fairly claim the honor of priority in this matter! But, failing in this, they have, as many of you know, in the words of M. Trousseau before the Paris Academy, generously awarded this honor to a member of your own body. But, hem, Mr. President, has that award been received by this Academy, and what consideration has Topical Medication met at its hands? Its advocate, stigmatized year after year for adopting a treatment, and claiming to perform operations whose practicability and great usefulness (although here denied) are now admitted among the scientific of the profession in every country in Europe, now stands accused by one of your body of employing a treatment—this same treatment which he, Dr. Beales, does not hesitate to declare "is at all times attended with extreme peril and risk of the patient's life." And, more than this, Sir, he has accused me openly in this Academy of having been by this treatment "the immediate cause of the death of his patient!" Sir, I deny this—utterly and absolutely deny it; and I here arraign before this tribunal, and that of the professional world, its author, for having uttered against a Fellow of this Academy a calumnious charge—one which he has not, and which he cannot, substantiate.

I have no desire to recriminate; I only seek for truth, and demand justice at your hands. But this I will say, in the words of the immortal Hunter—"Would to God that the minds of all my medical brethren could be so forcibly penetrated with the truism as I am, that he who degrades a fellow practitioner degrades himself and his Art!" [Loud applause.] Sir, I will not recriminate; for if my cause, if the position which I advocate, cannot be sustained in truth and in science, without sophistry or misrepresentation, then let it perish, and its author be forgotten. [Applause.]

At the close of his allusion to the mode in which his method of topical medication had been received by the Academy of Medicine, Dr. Gazzan was interrupted by Dr. Watson, the President, who declared that the Academy had never passed any censure on the treatment.

Dr. Hunter rose to a point of order. He suggested that if the President was going to address the Academy, it was usually deemed parliamentary that, in such cases, somebody else should occupy the Chair.

The President said he was not discussing the point. He was merely explaining the facts to Dr. Gazzan.

Dr. Beales—Sir, President, would it be in order for me to make a few remarks?

The President—Yes, Sir.

Dr. Beales—I only regret that I have not done, as my predecessors have done, with something written, or, if not, at least fully stated, verbal statement, that can be misunderstood. Having stated the whole facts of the case at the last meeting of the Academy, and, then frankly my opinion in respect to it, I did not expect to be called upon to speak again on the subject; but, in consequence of the remarks of Dr. Gazzan, I feel it due to myself, to my colleagues in the Fellows of this Academy, to answer some of his inferences. My remarks were made off-hand, and, therefore, I beg you to excuse me if all my words are not exactly what they were meant to be; I am ready to explain them at any time. First, in regard to this tuberculosis. I wish to state, first of all, that there was not the slightest physical sign of tubercle about the patient. The hostly that was found at the apex of the lung, was not, in my opinion, the slightest sign of tuberculosis. It has been said there was a cicatrix in the cavity. We did not pretend to find the sloughing; neither did I say that we had found it. As I said the other night, this was rather incorrectly described in calling it a cavity. It was not a cavity. It was, as I said before, scooped out at the apex of the lung. It contained no kind of fluid whatever, no lymph, no portion of false membrane. Dr. Gazzan read, the other night from Rokitansky a description of a tubercular cavity. I have since then looked over his description and there was not the slightest appearance about that cavity of tuberculosis as he describes it, nor as described by Andral, or Louis, or Fearns, or any of the writers who have described tubercular cavities. But I will go beyond that. Every one of these great writers, every man who has written on tuberculosis, states that it is a very rare and exceptional case that a single cavity is found by itself in the lung without any other signs of tubercle in other portions of the lung. There was no other sign of tubercle. The hepatization was the hepatization of pneumonia. The right lung was perfectly healthy. What does Louis say? It is so rare that there are not tubercles in both lungs, that in all his experience he has only seen five cases where a single tubercle was found in the left lung, and two where it was found in the right. Every one speaks of the accompanying local diseases that always exist with tubercular phthisis. Dr. Gazzan has read the opinions of different eminent men, but these all speak of applications to the larynx and trachea. I stated that I would not say that that disease at the apex of the lung was produced by nitrate of silver, because I confessed my ignorance, and that I did not know the effect of nitrate of silver on the lung. The Doctor has accused me of being ignorant of this matter, though I can confidently say that I have read every single volume he has quoted. He has not mentioned one single application to the lung. It has been all application to the trachea and to the glottis. I am aware that he has applied it a number of times to the lung; I am aware that it has been applied sometimes in Paris, but we do not yet know the results.

There is one point he alluded to very closely; I think he saw his own danger. I think he said that this application of nitrate of silver could not have caused the cavity in the apex of the lung, because the nitrate could not have reached there. Now, Sir, he diagnosed a cavity in the apex of the lung. If it could not get to the apex of the lung, why did he perform this operation?

Dr. Gazzan—I have already said that applications to the openings of the air passages are very useful in diseases of the lungs.

Dr. Beales—But with reference to the glottis line?

Dr. Gazzan applied nitrate of silver repeatedly without there being any disease at all. Dr. Beales proceeded to state the facts as derived from his patient, Mr. Whitney, in respect to his treatment by Dr. Gazzan. He corrected a statement made by Dr. Mott, to the effect that Mr. Whitney had informed him that a tube had been used by Dr. Gazzan on his last visit to him, and said, that from what Mr. Whitney had said to him of the instrument employed on the last occasion, he understood it to be a probang. The patient, he continued, had repeatedly dec ared that he had been killed by Dr. Gazzan, and that, within twenty-four hours of his death, he said to his sister, "I am a dying man, and it is a hard thing for a man to be murdered in this manner." This he mentioned for the purpose of showing the feeling of the patient. He would say that if Dr. Gazzan had performed this operation 100,000 times or 1,000,000 times, and had done no injury by it, it was no proof of his not having done an injury in the case now in question. No one had accused him (Dr. Gazzan) of doing any intentional injury. If he (Dr. B.) wished, he could bring forward evidence to show that he had done everything in his power to prevent this matter from being brought forward; therefore Dr. Gazzan's eloquent peroration did not fall upon his (Dr. B.'s) shoulders. Dr. B. repeated the substance of the statement submitted by him at the previous meeting of the Academy, as to the declarations of the patient in regard to the seat of the disease, and as to his (Dr. B.'s) theory of the manner in which this cavity was produced.

Dr. Green replied—Dr. Beales had stated, he said, that he (Dr. G.) located the cavity in his diagnosis, at the apex of the lung. But his location was below the clavicle, some distance below the actual apex of the lung. As regards the operation for tuberculosis by injection, he had at the previous meeting quoted Professor Bennett, of Edinburgh, and others, especially in France, who had successfully used this method of treatment in tubercular and other diseases of the lungs and air passages. He did not refer to these at this time because he had already submitted them fully. In Dr. Beales' statement Dr. Mott had been represented as saying to the family that they had found nothing in the post-mortem examination but what might have occurred within a week. Suppose this was so—how could the injection, which was made fifteen days before, have led to these pathological changes? Dr. Gazzan referred to numerous cases of croup, &c., reported in the Boston Medical and Surgical Journal of a late date, as having been cured by injections into the larynx and trachea. This was being done constantly in France and in our own country, and we had never heard of a single instance where any injury had been produced in the lungs by throwing injections into the trachea. He would say, then, if nothing had been shown by this post mortem but what might have taken place within a week, was it possible that that patient could have performed all the acts he did and lived as well and have been as hearty as he was during all this intermediate time, until he came to have the application of the sponge probang, though inflammation and ulceration of the lung were all the while progressing? There were erosions and ulcerations on the epiglottis and larynx, and he (Dr. G.) would be ashamed of his treatment, if, after having had a patient under his care for two months, he should not have effected some change, and that this was so is proved by the declaration of these gentlemen themselves, who say that they found the larynx and trachea perfectly healthy. [Laughter and applause.]

A member rose, and moved that the subject be referred to the section on the theory and practice of medicine.

Dr. Mott, however, rose and said; Dr. Green observed that when he was at my house after the death of Mr. Whitney, to get information from me relative to the post-mortem, that I did not mention this cavity in the anterior and left lateral part of the pharynx. If I did not it is a matter of surprise.

Dr. Gazzan—You spoke of the abscess, but not of the opening into it.

Dr. Mott—Perhaps I should have been a little more nice and correct. If I had known that all this hobbyity was to arise in that unfortunate case, doubtless I would. Now, there is no impropriety in the elucidation of it that I gave in the short paper which I read to you, which is, that it was more of a cavity than an abscess. At the lower part of it, just at the commencement of the œsophagus, it contained a little pus, but literally it was a cavity. What made that cavity, dependent saith not, because it is impossible for me to say. As I have stated in the paper read to you, that cavity was filled—all but filled—if you will excuse it, with a little pus. No more than nature throws out as necessary to carry off this extensive slough or old cellular tissue. It was, in truth, an empty cavity, with the exception of a little pus at the commencement of the œsophagus, and it was filled with dead and destroyed filamentous tissue. I defy any man, living or dead, ever to have reached an abscess situated there, upon any principle of sound surgery. Dr. Mott then reiterated his reasons why this abscess was undiscoverable, and could not be opened.

Dr. Gazzan said he did not state that Dr. Mott had not described the abscess to him, but he mentioned no opening, and it seemed to him that if an opening had existed large enough to admit two fingers, it ought to have been mentioned. It was said that when the opening was made the pus burst out. Now, he (Dr. G.) could not reconcile these two statements. Dr. Mott said there was no discrepancy in these statements. When the incision was carried along, and as the cut was made, a little matter made its appearance.

The discussion relative to the character of the abscess and the cause of the emphysema was continued at some length, but without eliciting facts not already stated.

Dr. Anderson rose and moved that the subject be indefinitely postponed.

Before the question was put,

Dr. Watson, the President, left the Chair, and claimed the privilege of making a few remarks. He had listened, he said, with a great deal of interest to the report of this case, and he did not wish now to make a speech on the subject. He merely wanted to say that he believed most of the statements that had been made by the gentlemen who had discussed this case were capable of being reconciled; and he believed that a thorough, and careful, and candid statement by those men brought together in conjunction, would put the case before the Academy, and before the profession, in such a light as would make it thoroughly understood. As it stood now, the case was not thoroughly stated, though he said so with all due respect to the gentlemen concerned. Mr. Whitney was a man between 40 and 50 years of age. (Dr. Beales—"54.") There had not been a word said here of his modes of life up to the time of this occurrence, so far as it might illustrate his case. He had been ill a year, it was shown, during which time he was under medical care, and not one word had been uttered in regard to his condition during that year. Now, they could understand very well that a thorough explanation of this man's habits and conditions, during this period, might add much to the facts they had now before them. His own opinion was, that a full and correct statement of the case had not been made on either side, and, with this expression, and without giving his views at length, he would put the question.

The President resumed the Chair, put the question on the motion for an indefinite postponement, and declared it lost.

The motion to refer to the section on the theory and practice of medicine was renewed.

An amendment was offered to refer it to a Committee of Seven, of which Drs. Gazzan, Mott and Beales should be members.

Dr. Green said that what he had wished for from the commencement, was that this Academy should have all the facts before them, and that the entire body should decide the question for themselves. If it were to be referred, he preferred that it should go before one of the sections, rather than to a Committee. He had stated all the facts he had in regard to the previous condition of the patient, though it was true there were certain others which he could have given, but was deterred by considerations for the patient and for his family.

Dr. Sayre asked if the specimen of the part of the larynx injured could be seen?

Dr. Mott said it could not be found.

Dr. Sayre then offered an amendment to the amendment already offered.

The President declared that an amendment to an amendment could not be received.

Dr. Gazzan then offered his amendment as a substitute.

That the President also refused to receive.

Dr. Salter then moved to strike out of the previous amendment, all after the word "Resolved" and insert the following:

"Whereas, As charges have been brought against Dr. Gazzan, a Fellow of this Academy, which have not been substantiated by the proper evidence, or any evidence brought before this body; therefore

"Resolved, That in the opinion of this body Dr. Gazzan should be exonerated from any censure or charge of malpractice in the case of Mr. Whitney, and that the subject be dismissed.

Dr. McNulty moved an indefinite postponement.

Dr. Beales declared that, as one of the members of the Academy had been arraigned for one of the greatest crimes with which a man could be charged, he did not think the Academy would be guilty of acting so much like cowards as to lay such a charge on the table or carry a motion to indefinitely postpone it.

[Loud cries of "Question."]

Dr. Watson, the President, decided, in reply to a question, that the discussion must be confined to the question now before the house.

Dr. Gazzan—Lo, we decide the question whether probes can be filled by a probang.

Dr. Beales—We do not bring into question whether the probang or the topical application of nitrate of silver be objectionable. I have never said any such thing. I use it myself; but the question is as to the application of it to the lungs.

Dr. Mott denied that he had charged Dr. Gazzan with killing Mr. Whitney. As for the topical application of nitrate of silver, so far as the larynx and trachea were concerned, there was not, he supposed, one man in fifty in the City who were not in favor of it, and there was no doubt that whatever was done by Dr. Gazzan in the case under consideration had been done by accident. Dr. Sayre's resolution would imply that they had censured Dr. Gazzan. But the object that the Academy had in view was simply to investigate the case. He denied that they had made any charge.

Dr. Sayre spoke to his resolution, deprecating the action of the Academy having resort to any subterfuge to shirk a positive expression of opinion on the question. He reviewed the history of the case, and argued that whatever opening there was could not have been made by any instrument before death, but was the result of the post-mortem examination. Everybody knew, he said, how difficult it was to remove hollow organs after death without lacerating their walls. This must be the case, he contended, because if there had been a lacerated opening there it could not have retained its contents, nor would there have been any remarkable projection of the thyroid body in consequence of this abscess. From the horizontal position of the patient the contents of the abscess, on a common principle of philosophy, would have escaped as naturally as the fluid would escape from a bladder with a hole in the side of it. Dr. Sayre continued to argue the case on the ground that Dr. Green had no participation in producing the lesions to which Mr. Whitney's death was attributed. When he had concluded, a member rose and renewed the motion for an adjournment.

Dr. Sayre hoped the Academy would not so far degrade itself. On the statement of Dr. Mott, Dr. Sayre proposed to strike out of his resolution the word "charge."

Dr. Reese then took the floor, and in the course of an able and somewhat lengthened address, discussed the ethics that should govern professional intercourse. In summing up the relative positions of the parties to the controversy, in regard to which he seemed to act as the pacificator, he declared that he considered that of Drs. Mott and Beales to be by far the least enviable. He conceived that the declarations of Mr. Whitney, that he had been killed by Dr. Green, was unworthy of the attention of the Academy, and deserved utter contempt—[Applause]—and the reiteration of that declaration before the Academy was worthy of equal contempt. [Renewed applause.]

After addresses by the President, Dr. Francis, and others, during which countless motions and amendments were offered amid increased excitement,

Dr. A. K. Gardner submitted the following preamble and resolution, by way of compromise, which seemed to be regarded as introduced with a view to save the accusers as well as him whom they accused:

"Whereas, Various statements by the public Press and otherwise, have reflected on the reputation of Dr. Green, and of Drs. Mott and Beales, as having conduced by their treatment to the death of Mr. Whitney, therefore,

"Resolved, That we, the Academy of Medicine, after a full examination of the reports of the case and the post mortem examination, do consider that his death was in no wise the consequence of improper treatment, but was the unavoidable result of a complication of diseases.

This amendment was accepted by Dr. Sayre, put to the house, and passed by a vote of nearly nine-tenths of all the members—which, on motion of Dr. Francis, was made unanimous.

The Academy then adjourned, it being well nigh to midnight.

HEALTH OF THE CITY.

Report of the Select Committee of the State Senate on the Health of New-York.

An Interesting and Instructive Document.

The Select Committee appointed under the amended resolution of the Senate, of the 3d of April, 1858, ask leave to submit the following report and bill:

The Committee entered upon the duty confided to them with a full knowledge of the labor it imposed, and the consequences which would attach to any action they might deem advisable to recommend to the Legislature.

As the result to be attained must necessarily affect the general welfare of a large community, irrespective of individual interests, the Committee determined to make their investigation as free and broad as possible. It was, therefore, not deemed expedient to issue subpœnas, or to administer oaths to the persons called upon to make statements or to give testimony. Printed notices were issued to all who were supposed to possess information which could be useful to the Committee, and the time and place for holding their sittings were made known through the public prints, to the end that all parties feeling an interest in the subject under examination might voluntarily appear and freely submit their views.

To secure an accurately detailed account of their proceedings, the Committee, at their first session appointed a Secretary to act as Clerk, a Sergeant-at-Arms, and a Phonographer.

The public sessions of the Committee were held in the room at the City Hall appropriated to the Library of the Corporation, and acknowledgments are due to the municipal authorities for the gratuitous use of commodious and convenient accommodations.

Of the large number of persons invited to give information either orally or in writing, 28 responded; of whom 20 were members of the medical profession, comprising some of our most eminent scientific physicians and surgeons in active practice and of large experience. It was not the purpose of the Committee in the course of their examination to impeach the conduct of any functionary of the City Government; their object was to deal with systems and the operations under them, in the hope that existing errors might be discovered and corrected, and imperfections removed. Portions of the testimony, however, pointed directly to the City Inspector's department, that the Committee felt it incumbent on them to allow the fullest range to Mr. Meacor, the incumbent of that office, in the explanations and statements submitted by him. The testimony on this branch of the subject is very full, and will convey to the Legislature all that can be said for and against the existing organization and management of that department of the City Government.

At an early day after the commencement of the investigation, the Committee invited a conference with the experienced Chief Magistrate of the City, and frequent interviews were had with that officer on the various questions before them. The recorded testimony was placed in the hands of Mayor Tiemann for examination, and the Committee have the satisfaction of believing that the views expressed in this report are in accordance with those entertained by him.

To give proper form and method to the information sought to be elicited from competent witnesses, the questions were propounded under three general heads:

First—As to the alleged fact that the City of New-York in proportion to its population has a larger ratio of mortality than other large cities in this country and in Europe.

Second—If the alleged fact be established, to what general causes is the excess of mortality to be ascribed? And,

Third—What remedies can be suggested for the removal of so great an evil?

There can be no question that under the first head the affirmative is fully established. The testimony is clear and conclusive, verified by statistics that have not been successfully invalidated. Under the second head the causes of excessive mortality are mainly attributed to the overcrowded condition of tenement houses, the want of practical knowledge of the proper mode of constructing such houses, deficiency of light, imperfect ventilation, impurities in domestic economy, unwholesome food, insufficient sewerage and want of cleanliness in streets and at the wharves and piers; and, finally, to a general disregard of sanitary conditions, the imperfect execution of existing ordinances and the total absence of a regularly organized, efficient sanitary Police. Under the third head many valuable suggestions will be found in the testimony, and such as were deemed judicious and feasible are embraced in the recommendations of this report.

Notwithstanding the alarming facts stated in the testimony, and which would almost sanction the idea that the City was universally in an unhealthy condition, yet the Committee have ascertained from reliable evidence that there are several remarkable exceptions to what might be deemed the general rule.

There are localities in the City in which the sanitary condition of the inhabitants is not surpassed by the healthiest portions of any other city. In support of this opinion, the following table is given in the testimony of the City Inspector, to whose general views on this branch of the subject the Committee desire specially to refer. While they substantiate the leading positions assumed in this report, they show conclusively that, under proper management, New-York may become in whole as well as in part one of the healthiest cities in the world:

Ward.	Population in 1855.	Deaths in 1854.	Deaths in 1857.
I	13,468	641	614
II	3,250	130	158
III	7,909	378	279
IV	23,605	752	719
V	21,917	794	959
VI	20,568	1,069	955
VII	24,448	1,206	1,290
VIII	24,052	1,218	1,014
IX	20,062	931	899
X	20,378	893	672
XI	22,679	1,288	1,441
XII	17,444	951	1,027
XIII	24,597	1,020	1,182
XIV	24,714	861	1,020
XV	24,426	436	548
XVI	22,020	1,169	1,325
XVII	20,546	1,027	1,066
XVIII	22,415	1,147	1,198
XIX	17,082	902	1,207
XX	17,028	1,029	1,110
XXI	22,016	1,304	1,173
XXII	22,020	919	1,309
Total	550,759	21,656	24,355

These tables, by a careful analysis, exhibit the following comparative ratio of mortality between the most salubrious and the most unhealthy Wards of the City:

Ward.	Population.	Ratio of Mortality in 54.	Ratio of Mortality in 57.
XV	24,040	18.12	22.68
IX	20,062	46.44	44.86
XI	22,679	56.82	63.51
I	13,468	47.59	45.60
VI	20,568	52.47	46.40
XIII	24,597	41.46	48.04

In examining these results, some allowance must be made for fluctuations in the amount of population, but in the main they are believed to be sufficiently reliable as a basis for calculation. The contrast of mortality which they present must arrest public attention. Of those above selected for comparison, in the most unhealthy Ward in the year 1857, one person died in every 21.86; while in the most healthy Ward in that year, only one died in every 48.60. The reasons for this striking contrast will be found fully stated in the testimony.

In determining the ratio of mortality to the population in the various Wards, there is one element affecting it which, if overlooked, would lead to a serious error: this is, that from several of the Wards, and those the most insalubrious, large numbers of persons who are taken sick in their homes are removed to hospitals and infirmaries in other Wards, of which, in case of death, they unduly swell the mortality, while they apparently diminish that of the Wards from which they had been removed. This remark will particularly apply to those which are above enumerated as the most unhealthy, viz.: the First, Sixth and Thirteenth. It is but just also to observe that the Wards which suffer most in their reputation for health from this consideration are the Twelfth, Nineteenth and Twenty-first, within which are embraced most of the class of institutions referred to.

In the Ninth, Eleventh and Fifteenth Wards the inhabitants mostly live in comfortable and airy dwellings, there are very few tenement houses, and families are not crowded together as in other less favored districts. The cellars are generally dry and well sewered, and even the domestics occupy comfortable sleeping apartments above ground. In short, the salubrity, and consequent local advantages for private residences of some of the Wards of the City, and especially where the march of improvement is most rapid, are unsurpassed in any city on this continent, and are in perfect accordance with the general healthfulness of our climate, and the meteorological character of that happy portion of the world's surface we inhabit, in which we find the greatest amount of health, the greatest success of industry, and the largest area of constitutional liberty.

What the Committee then desire to accomplish by their recommendations to the Legislature is, that the City of New-York shall be secured in every part alike in the means of preserving the public health; and that the blessings of light and sunshine and pure air shall be equally enjoyed by all its people, under the wise provisions of suitable laws. The fact cannot be controverted that many hundreds of thousands of dollars are annually bestowed by law on voluntary humane Associations for the cure of disease in the City of New-York, the existence of which could be entirely prevented by proper sanitary regulations. The excessive mortality which we seek to remedy, unless some effectual action takes place speedily, must, at a time steadily to increase, and to our national renown incident to the position of the City, which is limited in accommodation, while the population is constantly enlarging in its numbers.

A seaport open to every breeze from the waters, welcoming ships from every clime, the City of New-York is the key of the greatest inland trade in the world. But its superficial extent is limited. It is, nevertheless, destined to contain millions of inhabitants, and it becomes, therefore, an imperative question for its rulers to determine how and where its people are to find dwellings within its bounds. Its population, under existing regulations, must crowd each other, far more than even at present, where may be found thousands of persons crammed into a single block of tenement houses. How important is it then that due provision should be made in season to guard against the further inroads of disease and death resulting from causes within our control.

The present is the time, while at least one-half of the island remains to be built upon, to accomplish this beneficent work, and to secure beyond doubt or accident the permanent reduction of the mortality which is now so startling. Wise sanitary regulations may, under Providence, change the whole character of the future of New-York, and the legislative bodies which deliberate so earnestly over immaterial issues, should reflect on the serious responsibilities which attach to them, when such a state of things as is presented in this report calls upon them for prompt, wise, and active interposition.

The importance of whatever affects the sanitary condition of a community numbering three-fourths of a million of souls will readily be admitted, and the urgent necessity for such an investigation as the Senate entrusted to this Committee is fully established by the testimony herewith submitted. It is demonstrated beyond all reasonable question that in a portion of great City, whose progress in the material elements of prosperity astonishes not only ourselves, but the world, death is making an alarming inroad upon its population, and that the average yearly mortality is far beyond its due proportion. There are annually cut off from it by disease and death enough human beings to people a city, and enough of human labor to sustain it. Individual resistance to this mortal foe is entirely in vain. Hospitals, institutions of charity and benevolence, Dispensaries and Relief Societies abound in the community, but they cannot themselves hopelessly to arrest the evil, since the maladies for which they offer assistance, arise from causes over which they have no control.

Great cities are certainly the pride of nations, but they require a paternal control, and all Christian and civilized communities recognize the duty of exercising it. The difficulty has mainly been in devising the mode of using this power judiciously, so as not needlessly to place restraints upon personal freedom. The aid of science must sometimes be invoked to strengthen and direct the hand of government, and to guide legislation in the duty of providing remedies for existing evils. A due regard for the public health of populous and growing cities calls loudly for the practical application of scientific principles, resulting from investigation into the causes of increased mortality, and of the best modes of prevention. Such investigations are constantly in progress, and it is not the part of wisdom to reject the counsels which they offer. It is but recently that public attention has been drawn to the direct effects of light, the true character of the solar ray, and its chemical and healthful action, apart from its sensible heat. So, also, in regard to ventilation, and the introduction and diffusion of heat in dwellings; great progress has been made of late years in reference to these subjects, and the skillful architect of the present day readily avails himself of the knowledge which recent discoveries have bestowed. A great debt is due to science for such discoveries. Humanity finds in them practical and reliable agents for good.

But nature is full of remedial resources of its own, if we were ready and disposed to take advantage of them. The chemist, the pharmaceutist, and the surgeon would be spared much of their most painful duty if we could be brought to rely more upon wholesome air, direct sunlight and pure water. The City of New-York, thanks to some of its intelligent, energetic and philanthropic citizens, enjoys the advantages of the latter blessing in bountiful profusion. A healthful river flows beneath its streets and avenues, supplying every habitation with sufficient water to alley thirst, to prepare food, and to promote cleanliness. The island on which it stands is laved by two noble rivers, whose tides uplift and cleanse the respective streams. Its sewerage is advancing with rapid stretches from street to street, and the fresh breezes from the ocean temper the coldness and moderate the heat of its climate.

And yet, notwithstanding all these advantages, the mortality of the city is far beyond its proper ratio, and is rapidly increasing. The rate of deaths, as appears from carefully prepared statistics for the last seven years, is greatly in advance of former stated periods. The causes for this excessive mortality are mainly attributable to the rapid and steady increase of the population without a proportionate advance in the scientific application of sanitary precautions and remedies. Among the causes are the imperfect cleansing of the streets; the rapid increase of tenement houses, badly constructed, imperfectly ventilated, insufficiently drained into sewers, and impervious to the light and heat of day.

It will appear from the evidence that the most glaring nuisances are permitted to remain unabated during the hottest months of Summer, embracing large deposits of festering excremental matter in close proximity with the public markets, and that the public health is constantly endangered by the condition and inadequacy of the water closets in the houses of the poor, the filth of gutters, the stagnation of water in vacant lots, and the crowded condition of the dwellings occupied by the laboring classes.

Whatever local regulations exist in regard to these subjects, they are but imperfectly enforced, and it is unquestionably the duty of the State, which is the competent authority, to adopt without delay some change of system which will meet the exigency of the case. The Health Department, at present organized as a branch of the City Inspector's Office, does not accomplish the object for which it was established. The Committee recommend, therefore, that the present organization under that name be abolished. In devising a suitable and efficient substitute they have kept in view what they regard as properly the distinctive features of this branch of the City Government.

First—Whatever relates to the sanitary affairs of the City—the causes, prevention and cure of diseases, in all persons, brought under the public care, and the protection of the community at large from the effects of disease resulting from violation of sanitary laws; and,

Second—All duties which now are, or may hereafter be, devolved on the City Inspector, of a character different from those before stated. The duties under the first branch they propose to confide to a new board, to be called the "Board of Health," with an executive officer under the title of "Superintendent of the Public Health," with a subordinate sanitary officer in each Ward of the City. The Board of Health is to be composed in part of members of the medical profession; the Superintendent and his assistants to be qualified practitioners of medicine, competent to detect diseases and to apply the remedies. The duties comprised under the second branch it is proposed to leave in charge of the City Inspector.

A glance at the details of this subject will at once show the propriety of the conclusions to which the Committee have arrived.

The City Inspector's Department now embraces within its functions four several and distinct spheres of duty:

First—It has the care and supervision of the public health, including the inspection and removal of nuisances, the control and prevention of diseases, the registration of births, marriages, and deaths; and the chief officer is, moreover, one of the Commissioners of Health, and an official adviser of that body in all matters pertaining to the public health.

Second—It has the charge of the cleansing of the streets of the City, including the employment of laborers, the selection and supervision of dumping grounds, and sale of manure, and other matters pertaining thereto of a financial character, to the amount of from $300,000 to $400,000 annually.

Third—It has the regulation and management of the public markets, eleven in number, and

Fourth—It is charged with the duty of the inspection of weights and measures.

It is plain that the first of these multifarious obligations—the supervision of the Public health, involving the preservation of the people's lives by the discovery and suppression of preventable diseases—is the most important and serious that can engage the attention of the officers of the Department in question. Embracing, as it does, the great subject of public hygiene or sanitary science, in view of the health and lives not only of the living present which constitute the probable present population of New-York City, but also of the future millions by whom the island of Manhattan is destined to be inhabited, making it the chief City of the world, this subject is too grand, too far-reaching, too vital, to be subjected to any diversion, or to be incumbered with any extraneous matter whatever.

The evidence adduced before the Committee has convinced them, as they think it will convince any one who reads it, that preventive medicine, rising rapidly to the perfection of a science, is capable of exerting a vast influence over the welfare, physical and moral, of the human race; and the Committee are also well convinced that for want of the application of the precepts of this science to the local management of the City of New-York, it has suffered incalculably in these respects.

The duties of a Health Department in such a City as New-York, if properly constituted and arranged, would possess a magnitude and importance sufficient to occupy the time and talents of the best educated men to be found in the ranks of the medical profession. None other than such should be entrusted with so delicate and responsible a service. None other can perform it with proper efficiency, and when selected they should be relieved of every extraneous duty.

The Public Health Department of such a community should stand alone—it must stand alone—in its responsibilities and labors; and it is a manifest absurdity, wrong in principle as it will always prove injurious in practice, to place in the same hands such an incongruous variety of occupations, all, or nearly all of an onerous character, as we find combined in this one Department as now constituted. It is impossible that duties so incompatible with each other and so extensive, can be efficiently supervised and directed by a single head, for the first one incumbent who required the study of years so to inform and perfect the mind as to enable it thoroughly and properly to understand and appreciate the manifarious features and bearings of so vast a subject.

Such is the practical experience of many large cities of the world whose condition has been brought to our attention

[illegible] and what laws protect the prolongation of life and the exercise of human physical faculties we are not but without the requisite knowledge of the proper measures to be taken to add to the sum of human hap-

The inefficiency and opposition to this report will be found to embrace facts and opinions from the most [illegible] to the Government, and they [illegible] be carefully considered, as [illegible] the professional opinions of [illegible] practitioners in New-York [illegible] valuable suggestions [illegible] other members of [illegible] The views expressed by Dr. D. B. Reese, [illegible] number of the Health of [illegible] are deserving of the [illegible] consideration. In all that relates to the connection of the physical influences with civil architecture there is no higher authority than Dr. Reese, whose [illegible] devoted to the practical application of science to the useful arts, and especially [illegible] which affect health and human life.

[illegible] Vinas, Civil and Topographical Engineer of skill and experience, has submitted an interesting statement in regard to the original Topographical formation of the Island of Manhattan, in view of what he deems the urgent necessity of preparing a system of sewer-drainage in connection with the natural water-courses. The map which Mr. Vinas has prepared in illustration of these views, is [illegible] The Committee trust that [illegible] of the consulting engineer will receive the attention due to this important and [illegible] branch of the subject under notice.

A useful appendix is presented by a map and [illegible] which has been compiled by Messrs. Nexsen and [illegible] showing the [illegible] of the City for epidemic diseases and garbage.

The Committee were also favored with an analytical exposition of the present condition of tenement houses, and the evils resulting from their mismanagement, by Mr. A. H. H. Durand, formerly a member of Assembly, and the author of the report before referred to, on the same subject. This paper is full of practical information to be referred to the entering of constructing and occupying such dwellings.

The Committee refer to various general portions of this testimony in the hope that its importance, as a whole, will attract the attention of the members of the Legislature, whose action is invoked in regard to measures which it affords.

The bill which accompanies this report embraces the general provisions which seem to be considered necessary to enable the authorities of the City of New-York to correct a fast growing evil. Much of their success under any legislation will depend on the spirit in which the duty devolved on them is discharged, and on the vigilance, capacity and fidelity of the functionaries [illegible] in the work of reform. The subject [illegible] against the minds of the people of this City, and public sentiment calls loudly for the adoption of some active and efficient remedial measures. The Committee have discharged their duty in presenting as concisely as possible their views as to the evil complained of and the measures [illegible] immediate and effectual relief.

It remains for the Legislature to take such action, if any, in their judgment, is demanded by a [illegible] for the public good. Respectfully submitted.

[illegible] Feb. 3, 1859.

[illegible] report to the Public Health of the City of New-York.

[illegible] Board of Health of the City of New-York, represented in Common Council assembled, do enact as follows:

[illegible] The powers, duties and privileges, except [illegible] conferred by any existing law upon the Board of Health of the City of New-York, shall be vested in the following persons, viz:

The Mayor of the City of New-York;
The President of the Board of Supervisors;
The President of the Board of Aldermen;
The President of the Board of Councilmen;
The President of the Croton Aqueduct Board;
The Health Officer of the Port of New-York;
The Commissioner of Health;
The Mayor;
The Comptroller of the City of New-York;
The City Inspector; and
The Street Commissioner;

[illegible] shall be known as the Board of Health of the City of New-York, six of whom shall be necessary to constitute a quorum.

[illegible] to the powers and duties now by law conferred upon the Board of Health, said Board, as constituted in the preceding section, shall have the general charge, supervision and administration of the laws relating to the public health of the City of New-York; and shall also perform the duties of Commissioners of Health, for which services those who do not receive any compensation for other duties from the City Treasury or Board of Estimate, or fees for public services, shall each receive the sum of $250 annually, to be paid out of the City Treasury, in the manner hereinafter provided.

[illegible] The Board of Health shall appoint as their chief executive officer a medical practitioner of skill and experience, who shall be called the Superintendent of Public Health, who shall perform all the duties, and possess all the authority now pertaining to the City Inspector, relating to the public health, and such other duties as may be lawfully required of him by the Board of Health. [illegible] Public Health shall be appointed by the Health Wardens and other sanitary officers and report to the Bureau of Records and Statistics as now or may hereafter be authorized by law.

[illegible] The money required for the ordinary expenses and support of the Board of Health, and for the administration of the laws relating to the public health, shall be included in the annual estimate and requisition of the Board of Health, upon estimates and requisition of the Board of Health, upon estimates and requisition of the Board of Health, upon estimates

The New-York Times.

NEW-YORK, FRIDAY, FEBRUARY 4, 1859.

TERMS OF THE NEW-YORK TIMES.

THE DAILY TIMES is published every morning (Sundays excepted), and served in the city at a cent a week; mailed, Five Dollars a year.

The SEMI-WEEKLY TIMES—Three Dollars a year; two copies, to one address, for Five Dollars; twenty copies to one address for Twenty Dollars. Any person sending us a Club of twenty or more, will be entitled to an extra copy.

THE WEEKLY TIMES—Two Dollars a year; ten copies, to one address, for Twenty Dollars; twenty copies to one address for Twenty Dollars. Any person sending us a Club of twenty or more, will be entitled to an extra copy.

Remittances must invariably be in advance.

All letters to be addressed to the "NEW-YORK TIMES," New-York City.

Announcements this Morning.

NEWS OF THE DAY.

Neither the *Kangaroo* nor the *Asia* had been seen at Sandy Hook up to the time of going to press. The latter, it will be remembered, passed Cape Race on Sunday afternoon, and will bring a week's later news.

In the United States Senate yesterday, a memorial was presented from parties who are about establishing a line of steamers between New-York and Havana, offering to carry a bi-monthly mail for $10 per mile, or fraction at the same rate. It was referred to the Post-Office Committee. Mr. STEWART presented the memorial of the Legislature of New-York, for the improvement of Lakes and Harbors. He made a few remarks advocating the favorable consideration of the memorial, and characterizing it as one of the most able State papers ever laid before the Senate. It was read and referred. A report adverse to the claims of Messrs. LAMB and McCARTNEY, as Senators from Indiana, was made from the Judiciary Committee, and notice was given that the case would be called up on Monday. A motion that the two gentlemen be admitted to the floor pending the discussion of the case was laid over. Mr. HOUSTON introduced a bill to unite the two judicial districts of Texas, and made an elaborate speech in reference to the case of Judge WATROUS, whose removal the bill was intended to compass. The vote by which the Agricultural College bill was lost on Wednesday, was reconsidered on motion of Mr. GWIN, and further discussed and amended. It is to be further considered on Monday. The Indian Appropriation bill was then passed, and after an Executive Session the Senate adjourned. In the House, the Judiciary Committee were instructed to inquire into the expediency of reporting a bill to punish polygamy in the Territories, and to prevent interference with the Federal Judiciary. An adverse report was made from the Military Committee on the bill to establish a branch military academy at the Hermitage. A bill was reported from the Commerce Committee, to promote the [illegible] of the Army and Navy [illegible] heretofore [illegible] was [illegible] bill was then debated, in Committee of the Whole, until the adjournment, but without [illegible] followed in the way of retrenchment.

[illegible] of the Secretary of the Treasury [illegible] the actual [illegible] Its statements and suggestions are [illegible] in our special Washington dispatch, published on Wednesday morning. To realize his estimates, the importation of dutiable goods for the present fiscal year must reach $250,000,000, and for the next fiscal year, $290,000,000. He feels compelled to say that the receipts will not be adequate to meet the public expenditures, unless the latter should be materially reduced; and this he sees no prospect of. After suggesting various methods by which the estimates could be also lessened, the Secretary estimates his opinion, heretofore expressed, that the public debt would not be increased by a loan, and comes to the conclusion that the present tariff should be so modified, as to supply such deficiencies as may exist. To meet the immediate pressing exigencies of the Government, he recommends the issuance of Treasury notes for one or two years, which can be done by extending the provisions of the act of December, 1857.

The report that Judge ROOSEVELT, of this City, is to succeed Mr. DALLAS as Minister to London, is again current in Washington.

In the State Senate yesterday, the bill to prevent the issue of false bills of lading, and to punish the fraudulent transfer of property by shipowners, was reported favorably. The Committee appointed last year to examine the Health Department of this City, made a report in favor of reorganizing the Board of Health and making the head of the Department a medical officer. In the Assembly, the bill authorizing the trial of the Quarantine incendiaries in New-York or Brooklyn, was debated during the morning session, but without any result. During the evening session, the bill to regulate pilotage through Hellgate Channel was passed to a third reading.

An arrival from Cape Haytien at Boston, furnishes further particulars of the agitation in Hayti. The whole of the northern side of the Empire had declared for a Republic. The Intendent of Cape Haytien, having endeavored to stem the torrent, was imprisoned. Two thousand troops from the vicinity of the Cape had marched to the support of GEFFRARD. Other reinforcements for that general, which were on the march from Jacmel, were a portion of SOULOUQUE'S army which had deserted him. The Governor of Aux-Cayes, resisting the revolt had been shot. SOULOUQUE was at Azueheye, with his army in a destitute condition, unable to retain his men. His family and treasures were on board a vessel at Port-au-Prince, and it was supposed he would immediately join them, and save his life by flight.

News from San Francisco to the 10th ult. has been received by the arrival of the Overland Mail at St. Louis. There was great excitement in Santa Clara County relating to the murder of PAUL U. SHONE by THOMAS SHEARS. The military were called out to protect SHEARS, who was a prisoner. There was a rumor that three hundred prisoners in the Penitentiary had been poisoned by some chemical mixed in flour. A collision was expected to take place between the Probate Judge of Carson Valley, who is a Mormon, and the Gentiles. General KEARNY had been very successful in the war against the Indians in the North.

The Connecticut Democrats do not hold the present Administration in very good repute, if we are to judge by the proceedings of a caucus held in Hartford last night, to appoint delegates to Conventions. The Douglas delegates were elected by nearly five to one, and strong resolutions nominating DOUGLAS for the Presidency were passed almost unanimously. And, as though this were not enough, one of the delegates to the State Convention made a speech in which he denounced the Administration of Mr. BUCHANAN in bitter terms.

At a meeting of the American Institute, last evening, it was voted that it was inexpedient to sell the property, and the location of the building was referred to the Trustees with power. The Library and Financial Committees made their reports.

The Mayor sent a communication to the Board of Aldermen, last evening, recommending that the Board direct the Counsel to the Corporation to prepare a memorial to the Legislature protesting against the passage of any such bills as those now before the Legislature providing for the construction of railroads in this City, unless the Common Council petition therefor. The Mayor vetoed the resolution in favor of memorializing the Legislature for an amendment to the Charter giving the members of the Common Council a fixed salary. The Mayor also returned with his objections, the resolution in favor of repairing the Comptroller's office; he thought the charter did not authorize the passage of such a resolution until the Tax Levy was passed. On a resolution offered by Alderman BOOTH, directing that the City Inspector advertise for proposals for cleaning the streets, an interesting debate arose with regard to the disputed City Inspectorship. The resolution was adopted, and before the Board adjourned Alderman ADAMS resigned from the Committee to which the nomination of the Mayor for City Inspector was referred, and Alderman THOMAS was appointed in his stead. A proposal to groove the Rutz pavement in Broadway was referred. The Councilmen's resolution appropriating $2,000 for the celebration of WASHINGTON'S birthday was lost. The Tax Levy was made the special order for Monday next, to which day the Board adjourned.

At the meeting of the Commissioners of Central Park, yesterday, Mr. OLMSTED, the Architect-in-Chief, reported that experience already showed that the people were unaccustomed to attach value to that class of objects on which the beauty of a Park chiefly depends; that they are so unaccustomed to restraint, that when requested by a Policeman to desist from cutting trees or pulling up shrubs, they generally apply to have the Policeman discharged for impertinent interference. Resolutions were adopted requiring neatness and uniformity in appearance, and sobriety and good manners on the part of the keepers, and then the Board adjourned.

At the monthly meeting of the Chamber of Commerce, yesterday, several new members were voted in. A memorial was adopted to the Legislature, asking for the essential modification or repeal of the Usury laws. A Committee of Nine was appointed, with powers to elect trustees and form a corporation for the establishment of an Astronomical Observatory, to be located on the Battery, provided the City would furnish the site. The location of Central Park was opposed as unsuited to the wants of that portion of the community—nautical men—who would have most frequent occasion to use it.

Lieut. MOWRY, delegate to Congress from Arizona, last evening delivered, before the Geographical Society, an address embodying much valuable information on the Geography and Resources of that Territory. The audience in attendance was much larger than could have been expected on such weather.

The Coroner held an inquest yesterday in the case of WM. F. BAKER, who was stabbed a few nights since by JOHN LYNCH, with whom he boarded, on the corner of Pearl and Elm streets. *A verdict was rendered, charging LYNCH with be*ing the principal in the homicide, and his wife with being an accessory, and they were both committed to the Tombs to await the action of the Grand Jury.

The General Markets, yesterday, were very quiet for Cotton, Flour, Molasses, Hemp, and Spices. Wheat and Pork were in brisk request,—the latter at prime rates. Lard, Beef, Rice, Clover Seed, Turpentine, and Tallow were in good demand. A cargo of St. Domingo Coffee changed hands, for export, on private terms. Naval Stores and Oils were moderately inquired for. Freights were quiet.

The Public Health.

We are well aware that nothing is less interesting to a large proportion of the citizens of New-York than any subject connected with Municipal politics. Take your average respectable New-Yorker as he comes, and you will find that in nine cases out of ten nothing short of a pestilence or bombardment could make him listen to any proposition involving action, on his part, in regard to the affairs of the City in which he lives. If a French fleet were in the Narrows, or the yellow fever raging in Brooklyn, he would probably pay some attention to these facts, and, if he did nothing else, he would certainly leave the care of his house to the Police, and take the first train northward. The mere demoralization of the City Government, or the growth of garroting on the Bowery and Avenue A, or the depopulation of the First Ward by diphtheria and its kindred diseases, could hardly be expected to disturb the even tenor of his busy way.

Nevertheless, we feel it to be our duty to call the special attention even of this indifferent class to the report of the Special Committee of the State Senate on the Sanitary Condition of New-York, which we publish this morning. We shall thus discharge our proper duty as public monitor, and the public must decide whether it will do its own duty as well. The Committee have brought together, into one formidable array, facts and figures eloquent of shame and of sorrow to this great metropolis, which have been steadily accumulating upon us for the last ten years, and to which we have obstinately refused to pay the slightest practical heed.

They have established a rate of mortality for the whole City of nearly 1 in 27 of its inhabitants during the past year; a rate but little lower than prevailed in London when the bills of mortality were first scientifically registered two hundred years ago; and greatly higher than the actual ratio of mortality in the London of to-day. They have shown, that is, that in the first republican City of the world, governed by the people for the people, seated between two great arms of the sea, open to the healthful influence of the ocean breezes, and abundantly provided with all the necessaries of life, human nature is not more richly developed, more vigorous, or more prosperous than in the crowded and aristocratic London of the Stuarts, planted on the banks of a river and unprovided with one hundredth part of the conveniences which modern science has supplied to economy both public and private. They have shown, too, that the American cities of Boston, Philadelphia and Providence, neither of which is so fortunately placed as New-York in regard to climatic and local influences, far surpass us in the vitality of their populations. Nor is the future of our City more cheering than the present. The rate of mortality has risen more rapidly than the population has grown. This rise in the rate of mortality has been accompanied by a contemporaneous rise in the rate of disease—the last report of that excellent institution, the New-York Dispensary, showing an increase of six thousand in the cases treated during the last year. This decline in the sanitary condition of the people has been most marked, as the Committee observe, in the poorer and more crowded districts of the City, the rate of mortality ranging from *one* in *twenty-one* in Ward 1, to *one* in *sixty-nine* in Ward XV.; but the decline is, nevertheless, general, as the least familiarity with the physiological laws which regulate the life of great communities is sufficient to show that it must necessarily be. The tenement houses which breed disease in Ward I. propagate their unhealthy influences subtly and surely through the broad streets and into the spacious homes of Ward XV. Not less well settled is it that the process of deterioration in the health of a great community on reaching a certain point in the sinking scale, acquires a cumulative force which accelerates its movement; and the facts exhibited by the Committee are such as to warrant the most serious fears of the generation of new endemic types of disease in the midst of our degenerating race, unless measures be at once taken to which the Sewers of Staten Island have resolved to expose themselves and us, rather than tolerate a Quarantine on their shores.

The Committee have not, however, confined themselves to ascertaining the extent and imminence of these evils. They have pointed out the one great remedial step preliminary to all others, which ought at once to be taken. This is, the separation of the sanitary control of the City from the office of City Inspector. They recommend the creation of a Board of Health entirely devoted to the exclusive charge of all sanitary matters, at the head of a specific Medical Police. This Board should be constituted with a specific view to the duties to be done; with a power of supervision over the state of the houses of the people, as well as of the highways, and with authority to call into its service the highest medical ability of the country.

A change of this kind is so imperative as to be barely a matter of debate. Unless it is made, all attempts at sanitary reform must be as fruitless in the past as they have been in the future. The present accumulation of duties and responsibilities upon the single office of City Inspector, is only worthy of an inland village. The Sanitary Department of a City like New-York demands the whole care of the best talents that can be secured for it, and there is no more reason for leaving it to occupy the leisure of a City Inspector, than for making that officer Chief of Police, or President of the Board of Education.

The Austrian Empire.

The present aspect of affairs in Europe gives the world a particular interest in the position and resources of Austria. The attitude of that Power in Italy, beyond the limits of her own possessions as defined by successive European settlements, is so manifestly indefensible on any ground of international law; her conduct within her own dominions has so thoroughly alienated from her the sympathy of all that is liberal and progressive in Europe; the bad faith she has shown to one after another of the Great Powers, has so far weakened her hold upon any firm alliance, and her overt attempts to annul the Conventions of 1856 in Servia and the Principalities, have given every State in Europe so much cause for pressing any question that may arise with her to a decisive issue, that Austria may be fairly pronounced to be, at this moment, the most completely isolated nation in the world. Motives of Imperial policy may secure to her a temporary support as against the urgency of France or Russia, from her rival Prussia, and from the great Germanic family; distrust of NAPOLEON III. or a mere general terror of war may secure to her the transient diplomatic countenance of England; but should the affairs of Italy or of the East be forced to an open issue of arms, it is upon herself and her own strength alone that Austria must rely for the maintenance of that extraordinary Empire, for which it has been well said that Venus has done far more than Mars, and which has won by successful marriages all that other nations have been compelled to acquire by bloody and costly wars.

If war were now in modern times, or, indeed, had at any time ever been a mere question of fighting men, of armies, and of generals, Austria might not shrink from the dread arbitrament of battle. Her historic renown, impaired by the imbecilities of a MACK and a WELDEN, shines with the glory of a WALLENSTEIN, a Prince EUGENE, an Arch-Duke CHARLES, and a RADETSKY. If the world remembers Marengo and Austerlitz and Wagram against her, she may console herself with the recollections of Kehl and Caldiero, Neerwinden and Aspern. Her army is strong in a military fame to which the proudest of her antagonists must do honor. It is strong too in numbers. From the forty millions of her inhabitants she has drawn, since the peace of 1856, a force but little inferior to the armies with which she took the field against France in 1813-14. Austria has now under arms more than half a million of men—distributed into fourteen military divisions of the regular force. Of these 425,000 are infantry of the line, the majority of whom have seen two years of service; 68,000 cavalry, and 52,000 artillery, with 1,200 pieces of cannon. To these must be added the 75,000 light troops who protect the district, called the Military Frontiers, stretching from Quernaro to Bukovina, on the eastern boundary. This force is haps the only purely feudal army now left in Europe; the whole country being held on tenure of military service, and being as the Duke DE RAGUSA, Marshal MARMONT, described it, "one vast camp."

The regular army has been the object nearest the heart of the Emperor FRANCIS JOSEPH ever since his accession to the throne. Like MAXIMILIAN, of Bavaria, (perhaps his only real ally,) the young Emperor of Austria is a thorough martinet. He has spared no pains in the development of his army, and has bestowed upon his artillery a special attention, which is believed to have put it upon a level with the best in the world—the Italian campaigns of 1848-9 having demonstrated its inferiority at that time to the admirable artillery of Piedmont. In mere numbers the Austrian army probably falls short by nearly 100,000 men of the actual forces of France; but there is no reason to suppose that any great inequality exists between the effective value of the two armies, taken man for man; and the Austrian Staff arrangements and Commissariat department are admitted to have profited immensely by the experience of Russia and the Allies in the Crimean war. But the French army is thoroughly French, while the Austrian represents an empire in which 7,000,000 of Germans contend with 14,000,000 of Sclaves for supremacy over 20,000,000 more of Hungarians, Italians and Roumelians. This is an element of weakness in the Austrian power, especially of resistance, even more important now than it was in 1848, in 1809 or 1740.

Still more important is the financial weakness of Austria—a weakness which may be summed up, when compared with the position of France, by saying that while Austria is, practically, empty of the precious metals, and must go abroad for any loans she desires to make, France is stronger in specie than any other country in the world. The financial policy of Austria has forced upon the nation the most extensive paper currency of modern times, descending to sub-divisions of less than half a cent in the form of bank notes. The policy of France has fostered the natural tendency of gold to a country whose exports largely exceed her imports; and the abandonment of the silver currency has been too recent to drain France to any appreciable extent of that metal. If we take the railway history of the two empires as a criterion of their commercial policy, we find that while the splendid Austrian system, inaugurated by KUBECK, with the assistance of FRANCHCOMI, long before the system of the French railways was so much as planned, has been outrivaled in every important respect, the French railway companies, the French railways are, after those of Western Germany, the most successful investments of the kind yet made. The commercial marine of Austria has indeed made great strides since 1848—the port of Trieste growing at the rate of 68 per cent in 10 years, now equaling Havre and doubling Bordeaux in the value of its trade, and promising, should peace continue, and the Isthmus of Suez be pierced, to more than eclipse the ancient predominance of Venice in the Mediterranean traffic. But the Austrian Lloyds, the most persevering of Companies, while they have increased their tonnage from 1,974 tons in 1837, to 23,665 in 1856, and have greatly aided that development of the Austrian commerce which makes it now the third in rank among European States, have declared very small dividends, and cannot be considered to be a really flourishing Company; and in the present state of Austrian commerce any grave increase in the burdens of import, or any formidable maritime war, would seriously cripple the resources of the State and delay the development of the rich Southeastern provinces. On the side of the sea, indeed, Austria invites the blows of France. Her actual Government having punished Venice after 1849, by transferring the naval force of the Adriatic to Pola, near the head of the Gulf, is there carrying out the policy indicated by NAPOLEON I., when he ruled Illyria and Dalmatia. FRANCIS JOSEPH has spent $24,000,000 on the fortifications of Pola in the last seven years, and is fast erecting an Adriatic Sebastopol to be the stronghold of an Adriatic fleet. His Adriatic coasts, stretching about 2,500 miles from Isonzo where Italy ends, to Cattaro where Turkey begins, swarm with a race of sailors, of whom a conscription estimated at 55,000 men is at his service for any fleet he may choose to build. To suffer a Power already so menacing upon the Mediterranean to secure the whole Adriatic coast of Italy, add Ancona to Venice, and control the southern as well as the northern end of the Adriatic, would be madness in any French ruler; and this must be remembered in all speculations upon the opposition of NAPOLEON III. to Austrian advance in Italy. France has Austria at a disadvantage now. If he does not compel her at least to remain within the limits set for her by the will of Europe, the Emperor NAPOLEON will falsify all reasonable anticipations of his policy.

The Two Dromios.

It now appears, by the *Herald* of yesterday, that Mr. BUCHANAN has laid aside the plan of asking for the thirty millions to purchase Cuba, merely to have the subject ventilated, and without any actual intention of raising the money. He has decided upon raising the money first, and ventilating the subject afterwards. He has accordingly instructed BENNETT to say, that, if, after he has secured the cash, the "Hidalgos should refuse to sell, there is still no harm done, and the funds can be otherwise employed." Neither BENNETT nor he believe, however, that they will refuse. BENNETT says that the "coon will come down out of the Spanish chestnut as soon as the thirty millions are brought to bear on him;" meaning thereby that as soon as thirty millions are offered to the Spanish Government in part payment for Cuba, they will close the bargain at once. BENNETT and the President do not attach any importance whatever to the debate in the Spanish Congress, or the declarations of the Spanish Ministry, which have been recently quoted so much. Nothing in their own experience justifies them in doing so. None of their associates or intimate friends, as far as they know, ever allowed "their honor" to stand in the way of accepting a "good offer," and they are quite certain that they have never permitted anything of the sort themselves. The Spaniards should try this dodge with somebody else,—it won't do with the President and Mr. BENNETT, as they are quite familiar with it. Whenever they themselves talk of "their honor," it is in the hope of raising their price in the market. So CALDERON COLLANTES has expended his outburst of gentlemanly indignation in vain.

We shall probably know in a month or two the final conclusion to which these two sages have come as to what should be the precise proposition submitted to the public. BUCHANAN wanted a few weeks ago to have the thirty million scheme, as our readers may remember, put forward merely as "a feigned issue" to elicit discussion, and this ingenious device was feebly promulgated in due course in the *Herald*. BENNETT does not seem, however, to have given this any hearty support, as he objects on principle to ever allowing money matters to be treated hypothetically. If money is talked of at all, he thinks it ought to be talked of as a hard fact. Using it as a mere moot-point, or schoolman's thesis, he considers trifling with his feelings, which BUCHANAN, in consideration of the relation in which they stand towards each other, ought carefully to avoid. "There's some things," said the chronic "Irishman," "too serious to joke about, an' praties is won o' them."

This foolish sensitiveness on the part of Mr. BENNETT placed Mr. BUCHANAN in an awkward position. He had spent a whole week conceiving that idea of calling for thirty millions in order to excite discussion; and his friend, it is true, assisted in delivering him of it, but wanted to strangle it immediately after birth. To conceive a new idea is no easy matter for either of them; so BUCHANAN has been compelled to recur to the old original and genuine plan of getting hold of thirty millions somehow, and letting the public find subjects of its own for discussion. SEWARD and various other people find objections in great numbers, but BENNETT says that neither he nor BUCHANAN "are careful to answer in this matter." They know what they are about. They say, in the first place, that although it is true that two parties are necessary in every bargain, and that in this case there is only one to be had, inasmuch as the Spaniards refuse to sell, still the Spaniards lie, and will sell. BENNETT and BUCHANAN know they must lie in the nature of things; inasmuch as they *feel* it to be self-evident that no man or six men ever can refuse thirty millions for anything, when the money is to pass through their hands. It must be confessed that this argument places SEWARD in rather an embarrassing position. No argument derived from his lore or experience, can deal successfully with the self-consciousness of such metaphysicians as BENNETT and BUCHANAN.

In case, however, there should be persons found so mulishly obstinate as to refuse to accept the intuition of these two worthies as absolute truth, they have ready for the sceptics a final *coup*, which BENNETT has reserved for the close of his article. The thirty millions, he says, must be voted and placed in the hands of our venerable President—because if, which he denies, Cuba cannot be purchased, it will be wanted for fortifications in Florida. What a succulent, savory job peeps out of the following paragraph:

"We will look only at one other aspect of the data argument. Let us suppose that we do not purchase Cuba. The first thing we have to do is to fortify the Keys and we are never quietly, any more than we are now, in continuing commerce through the Florida channel, the great highway of our commerce with Mexico and ports of refuge, as a counterpoise against Cuba. The next step is to build forts and keep up a navy sufficient to maintain in our hands the control of the Gulf of Mexico and the Straits of Florida against Powers holding better strategic positions in those waters than we do, for a ninety-days' blockade of the Gulf of Florida would break every bank, merchant and trader from the Alleghanies to the Rocky Mountains. This would cost us many new millions; and the amount would go on annually increasing with the increase of our interests and the freshness of the danger."

Our readers will thus perceive that Mr. BUCHANAN must have the money in any case. If not wanted for Cuba, it will be wanted for Key West and Tortugas, so we had better give it him at once, and make no more months about it. He knows something about expenditures, and may safely be trusted to make them. In the noble letter written in 1852, which we republished yesterday, he pours forth with his usual conclusiveness, "sentiments" on the subject of national economy, which do equal honor to his head and his heart. If it be insinuated that that was four years ago and that he may have changed his mind in the interval, we reply that it is youth that changes. With "advancing years" come wisdom, firmness, fixity of opinions and prophetic fire.

Reforming the City Inspectorship.

The object of giving a new charter to the City of New-York in 1857, was partly to legislate a few men out of office, and partly to simplify the form of our Municipal Government, which had become so complicated and involved by reason of there being so great a number of elective officers, that it consisted rather of a congeries of Municipalities, all acting independent of each other, than a single corporation with one responsible executive head. In our General Government we have just one elective officer, all the other agents employed in conducting the multiform affairs of the nation, being appointed by him, subject to removal at his pleasure, and responsible to him for their conduct. In our City Government we had nearly a dozen departments whose heads were elected by the people, and over whom the Chief Magistrate of the City exercised no control whatever. The new Charter was somewhat of an improvement upon the old one, as it gave the appointment of the heads of some of these departments to the Mayor, and rendered them to a certain extent amenable to him. It gave something like a homogeneous character to the City Government, and the first good results of the change were found in the improved condition of the Street Commissioner's Office.

But the Charter still left too many elective officers, who are independent of the Mayor and Corporation. There was the Board of Supervisors, an independent body, possessed of almost as much power as the Board of Aldermen, and acting entirely independent of the Mayor and Common Council. Then there is the Board of Tax Governors, with immense power in their hands, and acting entirely independent of the other departments of the City Government. By a piece of successful engineering on the part of the Heads of the Street Commissioner's office and the City Inspectorship, at the time of the passage of the new Charter, these officers were permitted to remain until the term for which they were elected expired, when the appointment of their successors was given to the Mayor and Board of Aldermen. The Street Commissioner did not live long to enjoy his office, and a very excellent and competent person has been appointed in his place. But, in the office of City Inspector a contingency has arisen that could not have been anticipated; and the Mayor finds himself powerless to replace the former legal occupant of the post by a new man, because the old one refuses to abdicate, while the Board of Aldermen refuse to cooperate with the Mayor, in compelling him to leave a place to which he has no possible right. Instead of sending a squad of Policemen under charge of Captain LEONARD, to oust the presumptuous usurper, or taking some other summary measures to get rid of him, the Mayor has had recourse to the Legislature, and the costly and troublesome expedient is to be resorted to of amending the Charter to accomplish an object which might be reached in a much easier manner. It is like firing off a thirty-two pounder to kill a mosquito. The bill which has been introduced into the Legislature for the express purpose of ousting the contumacious ex-City Inspector, is entitled "A Bill Reorganizing the Board of Health." But the cure, in this case, appears to be much worse than the disease. A very simple remedy might have been found by giving the Mayor the power to appoint the City Inspector, without the cooperation of the Board of Aldermen; but, instead of that simple and efficacious method, it is proposed by the new bill to create an entirely new Department of Health, composed of an eclectic Board of ex-Officio, not one of whom may have any special qualifications for his duty, and so dividing the duties and responsibilities of the Department that it would be sure to be entirely ineffective for the object for which it was created. The duty of street-cleaning, the most important of all the duties belonging to the City Inspector's Office, is to be transferred to the Croton Commissioners, who have already business enough of their own to attend to, while the care of the Markets is to be transferred to the Finance Department, whose chief has quite as heavy a burden now as he can stagger under, if he attends properly to his duties. The City Inspector's Department may be considerably improved, we have no doubt, by lopping off some of the extraneous burdens which it is made to bear; but, if the duty of street-cleaning is to be taken from it, instead of imposing it upon another department, a separate office should be created expressly to take charge of this most important of all the duties devolving upon our Municipal Government.

A BOUNDARY QUESTION.—On Wednesday, Governor MORGAN sent in a Special Message to the Legislature in relation to the disputed boundary between this State and Connecticut. The dispute is not very serious, or more would have been heard about it by the people of the commonwealths concerned, very few of whom ever suspected the existence of such a matter. But the subject is of importance to the inhabitants of the territory in doubt, and on their petition is very properly brought to the notice of the Legislature. It appears there is a strip of land forty-two rods wide and fifty miles long, which, by discrepancy of survey, or from some other cause, is liable to be claimed by both States. That territory embraces a portion of the village of Hitchcockville. The question in respect to it is not now up for the first time. On the contrary, there is an existing Commission, appointed for its settlement a dozen years ago, and the Governor says (what will easily be credited) that the expenses of that Commission have been unnecessarily large; that they are still increasing, and that nothing is being done. He therefore recommends that the resolution a[illegible]

CITY INTELLIGENCE.

CHAMBER OF COMMERCE.—AN OBSERVATORY IN CENTRAL PARK.—The monthly meeting of the New-York Chamber of Commerce was held yesterday, the President, Mr. Cornell, in the chair. Resolutions were adopted to alter the By-laws, providing a new one for the ballot form of voting in the election of Members. Mr. J. Gn. F. Cooper offered a resolution in the present form. Mr. Fraser proposed the insertion of the words "unless a ballot be called for." Mr. Sonnenschein moved to lay the resolution on the table for one month, which was carried. The Committee on Collisions at Sea reported that they have no report to make. Mr. Roosevelt, from the Committee on the Usury Laws, read the form of a memorial to the Legislature asking for the repeal or modification of the laws. Mr. Cozzens had been informed that a modification only was all they could expect at present. The memorial was then adopted. Mr. F. Minzer, from the Committee on the Observatory, reported that the site on the Battery which they had asked to obtain for an Observatory had not been filled up. He did not think the site proposed in the Central Park would suit the purposes of the members of the Observatory, and proposed that a new Committee of nine be appointed with power to negotiate, if deemed necessary, or to memorialize the Legislature, and that they take measures to procure a suitable site, and that they be authorized to expend $10,000, upon condition that the Commissioners of the Central Park would provide a site on the Park. Mr. Cozzens objected that the Battery was the best place in the State as a public promenade. Mr. Roosevelt said, in view of the importance now attached to the Observatory for navigating our steamers, New-York ought to have as good an Observatory as any other port in the world. He favored a location on the Battery, if it could be had. As to the Central Park, a site there would be twelve miles nearer than would be needed. He said every consideration existed for having the observatory of our city masters as perfect as possible. The old mode of studying navigation had died out, and there were now few captains who could take a lunar observation. Commodore Perry stated to him that not one lunar observation was taken on his way to Japan. He advocated the adoption of the resolution. The resolutions were adopted, and the following gentlemen were appointed by the President as the Committee: Messrs. M. Maury, U. S. N., Superintendent, Dr. L. Taylor, R. Phelps, A. L. Stimpson, Jas. M. Weekes spoke upon the bar, and moved a resolution, which was adopted, for the appointment of a committee of five merchants. It should be to solicit the merchants to become members here. Mr. Cozzens briefly alluded to the Observatory.

A REPEATER MURDEROUS ASSAULT.—Two Men Arrested.—Coroner Hermans was yesterday called to take the ante-mortem examination of CHAS. BURNS, a native of Irish descent, residing at No. 71 Attorney-street, who says he was beaten by two men named Lynch and Barker. Then. The following is the substance of the wounded man, as returned on the Coroner's minutes: "On Sunday morning, at the corner of Clinton and Delancey streets, about 8 o'clock, I was in a Porter-house taking a drink. When I went in I saw some mutual friends being, whom I asked to drink. He did so, and in the course of conversation I asked him for all his wrongs were. He replied by requesting me to walk out doors with him. I did so, and he passed, and I got beyond the door still than he assaulted me with a cane-cane, striking me over the head and face with and knocking me down. After I was down they commenced beating me, and a man whose name I do not know kicked me when I was down. After they had finished beating me—and they stopped of their own accord—I managed to get home. During the day Officer Rouse brought two men before me whom I recognized to be those who committed the assault. The other witnesses referred to testified to having seen the men confronted with the injured man, JAMES Brand and Barnes Then, and that the former recognized them as his assailants. A verdict was rendered charging the accused parties with the commitment of the assault, and the Coroner ordered their commitment to prison to await the result of Burns's injuries. He presents a horrid spectacle, his face being badly cut, a portion of his scalp knocked off, and his body covered with bruises. His injuries are pronounced.

THE REMOVAL OF THE CUNARD LINE OF STEAMERS.—The Common Council of the City of New-Jersey have explained the opinion that there is a movement on foot to deprive that city of the benefits derived from the occupancy of its wharves, under the pretence of facilitating the delivery of goods, by requiring that the goods be immediately on their arrival removed to warehouses in New-York, while the real purpose was a final removal of the Cunard line of steamers from Jersey City to wharves up town in New-York—a movement which they apprehend would greatly inconvenience travelers, to whom the present arrangements are, as they claim, entirely satisfactory. In view of this supposition they have passed an resolution directing the Corporation Attorney to prepare a memorial to be signed by the Mayor and the Clerk, under the corporate seal of the city, and forwarded to the Secretary of the Treasury, earnestly remonstrating against any change in the matter of landing the Cunard steamers at their wharves, calculated to create dissatisfaction on the part of merchants or others interested in the landing goods from said steamers, and urgently requesting that the application hinted at for a change be positively refused. The resolutions is to be sent to the Representative from the Fifth District, and to Senators Wade and Trumbull, with a request that they take prompt measures to thwart the schemes of the parties engaged in the movement in reference to the Cunard steamers.

THE CORPSE IN A BARREL.—It is not yet forgotten what excitement was caused in the City nearly a year ago by the arrival of a barrel upon a Western railway train containing the remains of a woman so terribly mutilated that its identification was believed to be an utter impossibility. That a murder had been committed was deemed unquestionable, and the shipment of the mutilated remains in the mode described was believed to be the work of the murderer, done to avoid detection. The barrel was preserved, and the telegraph was used to discover where the barrel was shipped. Slowly but surely the mystery was unravelled. That "murder will out" was never more forcibly illustrated than in this case. The body proved to be that of SUSAN WEBSTER, who had been murdered at Chicago by HENRY SNIVERSE, a young barber, whose brother, she was. Ex-Coroner HELM, Ross Mansfield, formerly Detective under Ex-Chief of Police MIGHAM, Dr. WOODSON BEACH, and the widow of the Dead-House at Bellevue Hospital, journeyed yesterday from Chicago, where they had been summoned to attend the trial. They gave their testimony, coupling all the facts connected with the arrival of the body here and its reshipment to Chicago. The case is still pending, and should more interest than any trial that has been conducted in that city.

STREET FOR BEATS.—An improved, constructed upon a new principle, is now in process of construction, partly in this City and partly in Milwaukee. It is the invention of Mr. Norman Wright, of Janesville, Wis. The boat is intended to ply on the Mississippi River, between Prairie du Chien and St. Paul, a distance of 300 miles, and will connect with the Mississippi and Milwaukee Railroad. The application of steam power has given very novel features. The boat is constructed of thin sheet-iron, and is 70 feet long, 9 feet high and 12 feet wide, and is intended to give perfect security should the ice in any emergency chill. A cabin is fitted up with seats for one hundred passengers. The wheels are supported on two pairs of pontoons, long boats, journals, so as to allow them to revolve, with little or no friction upon the ice. The attachment of these pontoons admits of raising and lowering the hull of the boat, so that its bottom may be from three to five feet above the ice, as the depth of water may require. The engines and driving-wheel are placed at the stern, and the wheel is hung in adjustable spring bearings. The driving-wheel and pontoons are being made at the Novelty Works. The remainder of the work is under way at Milwaukee.

THE SEASON.—Since the clear, pleasant weather of Tuesday morning, the greater portion of Wednesday, we have had what seems to be a "northeaster." The wind has howled through the streets as loudly as it does through the forests, when the leaves are falling. There were but outbreak of vessels yesterday, in consequence of the storm. In the morning the should have Connecticut started from here on a regular trip, but had not been long out before her captain deemed it prudent to return until the passage of the storm. In the afternoon the wind had some down sufficiently for the Captain of the Connecticut to be confident of sailing, so he left with the Connecticut's passengers. During the previous night the cold increased, so that for several hours after daylight the streets were covered with ice, rendering walking dangerous. Early last evening the weather moderated, and at 11 o'clock last evening it snowed heavily.

THE APPROACHING MURDER IN THE FOURTH WARD.—Ellen Gaffey, the woman who on Wednesday afternoon, was the victim of the terrible assault with a hatchet in the house of PATRICK ROHAN, with whom she lived as wife at No. 180 Cliff-street, was alive last evening. Despite the huge number of wounds she received, Dr. SWEANY says there is a large possibility of her recovery. She alleges that Rohan was in the habit of striking her, and that this was the reason of her packing up her things to leave him. She was detained yesterday in the law's stand to take her testimony, and Rohan is still locked up awaiting the result of her injuries.

FROM THE PAWNBROKER'S TO THE BUM-SHOP.—John Shannon, who has been but a few days out of the Penitentiary, yesterday went into a pawnbroker's establishment in Twenty-fourth-street, took off his coat, hat, vest and boots, pawned them for twenty-five cents, and then hurried to a Bum-shop and spent the money for rum. Maddened by the liquor, he went home and commenced beating his wife, till a policeman was called and arrested him. He was taken before Justice KEYS and committed to be sent back to the Island.

THE VARIOUS SCHOOL MURDER.—The inquest in the case of BRIDGET O'BRIEN, the young man who was shot in the outdoor shop No. 242 Water-street, by Mr. Frost, the proprietor, which was adjourned for yesterday, was continued till to-day. The testimony produced is to very contradicting from the contrary allegations that have already been made by those who were present when the shooting occurred.

TAMMANY GENERAL COMMITTEE.—The regular Monthly meeting of the Tammany General Committee was held last evening, Michael Ryerson, of the Seventh Ward, in the Chair. The evening was spent in discussing the by-laws, and it was finally voted to print 500 copies for the use of the members. The Committee then adjourned.

DEMOCRATIC REPUBLICAN GENERAL COMMITTEE.—This organization met last evening at Mozart Hall, C. A. Maj, Vice-Chairman, presiding. A letter was received from Ex-Sheriff J. G. WALSH, accepting the Chairmanship of the organization. The usual yearly Committees were appointed, after which the meeting adjourned.

MR. VANDENHOFF'S READINGS.—Mr. GEORGE VANDENHOFF's third "Evening with Shakspeare," tonight, will consist of the reading of "The Critic, or a Tragedy Rehearsed"—Sheridan's brilliant production—preceded by an introductory sketch. Mr. VANDENHOFF's entertainments, at his neat little hall in Broadway, are well worthy the patronage of the intelligent.

THE REV. E. H. CHAPIN'S LECTURE.—The Rev. E. H. CHAPIN will repeat his Lecture on "Social Forces" at the Cooper Institute this evening before the Young Men's Literary Societies.

Police Reports.

MORE TICKET-SWINDLING.—George L. Ward, the operator in bogus tickets, who swindled the Canadian school-teacher a few days ago, has had the misfortune to encounter a tough customer in the person of a Mr. Benj. Weston. The gentleman named, who resides in this City, had occasion a short time since to visit Washington. He stopped into Ward's office, where he was told that $10 was the price of a ticket. He threw down some money, and, as he alleges, was swindled out of $5 in the change, and received a ticket for passage in an emigrant-train. Mr. Weston went to Washington, but not in the emigrant train. He returned to the City yesterday, and had Ward arrested. He expresses a determination to prosecute the matter until Ward gets his just deserts. The Canadian school-teacher asserts a similar determination. He says that efforts have been made to buy him off, but that he is not to be bought.

YOUTHFUL FINANCIERS.—Wm. Burt and Alonzo Kendrick, both young men, have lately turned their attention to negotiating forged drafts, and with marked pecuniary success. Wm. J. Bunce, who has been in Chatham-street; Dr. George Rose, of No. 11 Canal-street; John C. Hart, of No. 167 William-street; George F. Worden, and others, have been entrapped into parting with current City bills for their forged drafts. The youthful financiers were yesterday arrested and locked up for trial.

BLANK BOOKS CHEAP.—A youngster, named Charles Hastings, stole $90 worth of blank books from the office of the Howard Insurance Company, in Wall-street, and sold them for two cents a pound to James O'Leary, a junk dealer in Cedar-street. The dealer in junk thought he had made a splendid bargain, until his arrest yesterday on a charge of receiving stolen goods. He was taken before Justice WELSH, and, together with the boy, committed for trial.

THE NEW POLICEMEN.—The new Policemen who were appointed by the Police Commissioners on Wednesday, were sworn in yesterday by Mr. Embree, the Chief Clerk, and shields given to them. Only 25 appointments remain to be made to complete the list of 250 lately authorized by the Board of Supervisors.

STEALING GIN.—James Murphy was yesterday morning detected coming out of the liquor store of Michael Smith, No. 18 Dover-street, having in his possession five demijohns of choice liquors. The liquor was taken from him and he was taken before a Police magistrate and locked up.

The Last Elm-street Murder.

A MAN AND HIS WIFE CHARGED WITH THE HOMICIDE—CORONER'S INQUEST AND THE VERDICT.

The inquisition touching the death of the sailor, WM. F. BAKER, who was alleged to have been stabbed by JOHN LYNCH, with whom he boarded, at the corner of Elm and Pearl streets, was held yesterday by Coroner O'KEEFE, at the City Hospital. The evidence gives a somewhat different version of the affair from that heretofore reported. The original statement, it will be remembered, was, that the deceased and his wife boarded with LYNCH, and that on last Saturday evening the former came home and announced his intention to take board elsewhere, and, thereupon, LYNCH became greatly enraged, seized a shoe-knife and stabbed BAKER several times in quick succession. According to the testimony the deceased came to the house intoxicated and expressed a determination to fight with some one. He started to leave the room for the alleged purpose of carrying out his intention, when he got into a dispute with LYNCH, which ended in his being stabbed. The wife of LYNCH asserts that the only knife she saw was in the hands of MARIA LYNCH, the alleged wife of BAKER—but who, it is said, was his mistress. BAKER's alleged mistress denies having had a knife at all, but frankly confesses—the same confession being made by the wife of LYNCH—that she was so intoxicated that she could not see much of anything. Both also stated that LYNCH was intoxicated as well as BAKER. The following is the substance of the testimony:

Maria Lynch testified that she lived with the deceased as his wife, and that they boarded with John Lynch and his wife, at the corner of Pearl and Elm streets; the prisoners were no relation of hers; on Saturday evening last the deceased came home a good deal intoxicated; he wanted to quarrel with some one, and shortly a dispute arose between him and the prisoner; after a brief scuffle, the deceased told her he was stabbed, which was the first she knew of the stabbing; she recognized the knife produced as belonging to the prisoner.

Henry Hughes, the proprietor of the lamp-store No. 506 Pearl-street, testified, that his place was underneath that occupied by the prisoner and his wife; on the Saturday evening referred to he heard a scuffle up stairs, and upon going up found that the deceased had been stabbed; the prisoner and his wife and the deceased and his wife were all a good deal intoxicated.

Officer Muldoon, of the Sixth Precinct, stated that the wife of the deceased called him to go and see her husband at No. 25 Mulberry-street, he having been stabbed; he went and saw the deceased, and asked him who stabbed him, to which he replied, "Never you mind, the fault is as much mine as Johnny's;" he afterwards arrested John Lynch, and obtained possession of a shoe-knife, which had the appearance of having been recently cleaned.

Mary Fitzgerald testified that she lived in the house occupied by Lynch, and heard a great noise in the room of deceased on Saturday evening last; she saw the deceased; heard that the deceased had been stabbed.

Ellen Lynch testified that she was the wife of John Lynch; on Saturday evening the deceased came home intoxicated, and said he wanted to fight with some one; he and Maria Lynch, the woman who lives with him, shortly had a dispute, in which her husband joined; Maria Lynch had a knife in her hand, which she attempted to take from her; she was herself a good deal under the influence of liquor at the time; she saw no blood on the floor, or about the place after the occurrence; her husband, the deceased, and Maria Lynch, as well as herself, were all intoxicated.

Maria Lynch, being recalled, confessed to being intoxicated, but denied that she had any knife in her hand during the disturbance.

Dr. Quinby, surgeon at the City Hospital, testified that the deceased came to his death from peritonitis and internal hemorrhage, the result of five stabs, three in the chest and two in the abdomen.

The Jury after a brief deliberation rendered the following verdict: "That Wm. F. BAKER came to his death by being stabbed with a knife in the hands of JOHN LYNCH, aided and abetted by his wife, ELLEN LYNCH, on the evening of Jan. 29, 1859."

The accused parties, following the verdict, were recommitted to the Tombs, to await the action of the Grand Jury.

The husband gives his age as 27; birth-place, Ireland; occupation, shoemaker; and says he is innocent of the charge preferred against him. His wife also alleges innocence. She is two years older than her husband, and is also a native of Ireland.

BROOKLYN INTELLIGENCE.

FATAL AFFRAY.—On Sunday last, THOMAS SERRIES and MICHAEL DWYER, in the employ of JEREMIAH R. DEMARIS, contractor, had a difficulty in a stable on Baltic-street, during which DWYER stabbed SERRIES in the face with a pitch-fork. One prong entered the left eye, inflicting a wound which caused death yesterday morning. The wounded man was taken to the Long Island College Hospital, where every attention was given to his case. The fork had passed into the brain about four inches. The only thing known relative to the origin of the quarrel is what DWYER himself states, as the parties were alone, and the injured man was not in a condition to give a statement. DWYER states that the deceased attempted to clinch him, and he raised his hands, with the fork in them, to defend himself, when the wound was inflicted. Coroner HILMER will hold an inquest to-day.

FOND OF POTATOES.—WILLIAM SMITH was arrested yesterday for defrauding several produce dealers, both in New-York and Brooklyn, out of large quantities of potatoes. He was held for a hearing.

THE EVENING SCHOOLS.—The last of the Evening Schools, No. 17, was closed on Wednesday evening, with appropriate exercises. The average attendance upon this School during the four months it was open was 206—males, 106; females, 100.

The Italian Question—Note from the Brownlings.

Having seen a statement in the American newspapers that Madame MAZZI, into Miss Jessie Meriner Wheeler, has arrived in the United States, "to receive medals for the Emperors," &c., &c., to lecture on "Oneness" and "Italian Politics," we feel ourselves desired to explain distinctly that, with a strong personal affection and esteem for Madame MAZZI, and a love for liberty and the democracy, still better known to all who know us, we yet entirely dissent both from her views of Oneness and her opinions upon Piedmont, considering that every attack on the Piedmontese Government is leveled also against the general Italian cause. This is the first time we have noticed a printed observation on ourselves, and only a painful sense of duty constrains us to do so now.

ROBERT BROWNING.
ELIZABETH BARRETT BROWNING.
ROME, Wednesday, Jan. 5, 1859.

Drs. Caroline Brown and Mary Stowel are among the regular advertisers in the Utica papers.

PERSONAL.

The New-York correspondent of the Philadelphia Press says: "I had an interesting chat last evening with Mr. Milburn, "the blind preacher," as he is popularly called, who related some incidents of intercourse with Prescott, the historian. He passed last Wednesday evening alone with Mr. Prescott in the study of the latter at Boston. They had long been friends, doubly so from the fact that both were the subjects of a similar misfortune—blindness. They talked of literature, of history, of topics of current interest. The historian never seemed in higher health or more genial spirits. It was the last evening given to any one beyond his immediate family circle. The first news that met Mr. Milburn's ears, on his return home two days afterwards, was the sudden summons of his friend from life to death."

Henry Shaw, Esq., a wealthy and public spirited citizen of St. Louis is engaged in laying on and constructing an immense arboretum and garden on the plan of the *Jardin des Plantes* as a gift to the city of St. Louis. His design seems to be not only to make it a complete collection of all the known trees, plants and shrubs, but to include in its objects a full course of instruction in all matters relating to agriculture.

Senator Stow and wife are at the Clifton Springs Water Cure near Canandaigua. His nervous system is very much shattered, not having slept of any consequence for some two months. It is doubtful if he resume his seat in the Senate during the present month.

Bishop Bailey, of Newark, has purchased a site for the erection of a new Cathedral Church on High-street, in that city. The lot is 240 by 120 feet, and cost $10,000.

The Trustees of the Indiana State University have accepted the resignation of Dr. Daily, and elected Professor Wiley, Senior Professor, to take charge of the Institution, temporarily.

The Hon. J. F. H. Claiborne is now engaged on the life of General Quitman—all the correspondence and other papers of the late General having been placed in his hands.

It is a fact not generally known that the Count de Montalembert married a niece of Gen. Lafayette.

Ex-President Fillmore was at the Delavan in Albany on Tuesday.

OBITUARY.

Quintus F. Atkins, one of the Reserve pioneers, died in Brooklyn, Cuyahoga County, on the 23d of January, aged 77.

The Rev. Abiel Abbot, D. D., died in West Cambridge, near Boston, on Monday, aged 63 years.

Singer's Sewing Machines.—In point of beauty durability, perfection of work, and capacity to perform every variety of sewing, no other sewing machines can compare with Singer's. New and approved machines at greatly reduced prices.
I. M. SINGER & CO., No. 458 Broadway.

Grover & Baker's Celebrated FAMILY SEWING MACHINES,
NEW STYLES—PRICES FROM $60 TO $125.
THE BEST MACHINES IN MARKET.
Offices: No. 495 BROADWAY, NEW-YORK.
No. 103 FULTON-ST., BROOKLYN.

At WOOD'S Gymnasium,
No. 9 East 29th st.

Singer's Sewing-Machines.—Every mechanic who begins the year by purchasing one of SINGER'S SEWING MACHINES will be $1,000 better off when the year ends. I. M. SINGER & CO., No. 458 Broadway.

A Proclamation!
THIRTY MILLION DOLLARS SAVED TO THE COUNTRY.
THE PRESIDENT NO LONGER THINKS OF BUYING CUBA.
Argument and entreaty are exhausted. He has now come to a very sensible conclusion, viz.: to arm one thousand men with the VOLCANIC REPEATING RIFLE, which carries thirty balls, and can be loaded and discharged thirty times in less than one minute. One thousand men, armed with this Rifle, would be equal to thirty thousand armed with any other weapon. If our worthy Chief Magistrate does not bestir himself the Cubans will be ahead of him, as they now buy for them in large quantities, and will soon be able to defend themselves against any force that can be brought against them. The balls are all waterproof—hence their great superiority over any other arm. No changes of climate, or even immersion in water, affects them.
Colt's Pistol, so long considered the *ultima ratio* of Firearms, is now fairly outdone by this new invention. Their beauty of construction and simplicity of movement are the wonder and admiration of all who have seen them. As was remarked a few days since, by one of our most accomplished commanders, "The man who invented that gun was a benefactor to his race, and the nation that was in possession of such a weapon need never fear even the combined armies of the world, if their cause was just."
Guns and Pistols, carrying from seven to thirty balls. This arm is now on exhibition and for sale, at wholesale and retail, at the Company's dépôt, No. 261 Broadway, New-York.
JOSEPH MERWIN,
Sole Agent for United States.
Also agent for the celebrated G. D., C. & T., and Waterproof Percussion Caps.

MERCANTILE LIBRARY ASSOCIATION.

Pursuant to mutual arrangement, the Principals of Bryant & Stratton's Mercantile College have consented to meet the classes and members of the Mercantile Library Association at their Lecture-room, No. 23 Cooper Institute, for the purpose of elucidating the method of teaching Accounts and the Collateral Sciences, as practiced at their Colleges. This will afford an excellent opportunity to such as are desirous of testing the merits of institutions of this kind, and, it is hoped, will prove of sufficient interest to secure a full attendance of the members of the Association. C. E. WEIDNER,
Chairman Class Committee.

The lecture above specified will be delivered at Room No. 23 Cooper Institute on MONDAY EVENING next, Feb. 7, at 7½ o'clock, to which the public generally, and business men in particular, are cordially invited.
S. S. PACKARD, Resident Principal.

PHOTOGRAPHING ON WOOD
AND ENGRAVING.
GREAT REDUCTION IN THE PRICE OF WOOD-CUT ILLUSTRATIONS. The subscribers (by Price's patent process of photographing directly on the block of wood, and engraving therefrom,) are enabled to produce a more accurate representation, and at less cost, than by the old tedious method of hand-drawing.
Photograph likenesses for engraving can be taken from the original or other pictures.
Dwellings, carriages or machinery taken in any part of the City, if necessary.
Landscapes, medical illustrations, envelopes, &c., produced with accuracy and dispatch.
WATERS & TILTON,
Photographers and Engravers,
No. 90 Fulton-st., New-York.

THE TIMES BUILDINGS.
The best place in the United States to contract a fine building was the spot in front of the Park where the building now stands of the *New-York Times.* It is surrounded by streets on all sides, it makes a small block by itself, it fronts on the City Hall Park, and is flooded with light from all quarters, from the rising to the setting sun. The best place in this central spot of taste, business and splendor, was taken for a Restaurant by CROOK & DUFF, and since they opened it last Spring it has been crowded. They give the earliest breakfasts and the latest dinners that are to be had down town, and at prices which amazed us when we looked at their Bill of Fare. The entrances are from Park-row and Nassau-st., up stairs for the Restaurant, and down stairs for the Lunch-Room, &c. The whole establishment is maintained with the utmost degree of elegance and convenience for the guests; and with a system of economy and rapidity of execution of orders, which surpasses the expectation of every guest.

PIKE'S PEAK
GOLD MINES.
The subscribers propose to transport any given number of pounds from Leavenworth City or other points on the Missouri that may be agreed upon, to the Gold Mines of Pike's Peak, Cherry Creek, and the Platte, during the months of April and May, with dispatch and on favorable terms. For our practical experience as Transporters on the Plains, and our responsibility as common carriers, we refer to Col. D. D. Tompkins, Assistant Quartermaster-General; J. F. Souther, President of the Bank of the Republic; William Van Dozer, No. 195 Fulton-st.; Benjamin Holliday, Tontine Buildings, Wall-st., and J. B. Simpson, Nos. 5 and 7 Nassau-st., Continental Bank Buildings, New-York City. To the latter gentleman, our General Agent, we refer for all particulars. Early applications will meet with favor.
(Signed) RUSSELL, MAJORS & WADDELL.
LEAVENWORTH CITY, K. T., Jan. 28, 1859.

MUSICAL BOXES.
The undersigned offer for sale a large assortment of MUSICAL BOXES, playing 2, 3, 4, 6, 8, 10, 12, 16, and 32 tunes, with different accompaniments, and with a variety of
AMERICAN,

FOR SALE.

RESIDENCES ON THE HUDSON RIVER FOR SALE—Situated about 20 miles from New-York, and ¼ of a mile from a depot on the Hudson River Railroad. These are six acres of land, with cottages and out-buildings complete; house supplied with water and gas; great variety of fruit and shade trees. Possession immediately. A large portion of the purchase money can remain on bond and mortgage. Apply to GEORGE JONES, office of the Times.

FOR SALE—THE FIRST-CLASS DWELLING house No. 68 St. Mark's-place, roseide with every convenience and in perfect order; house 30 feet front by nearly 60 feet deep; lot 25x90 feet; the house is beautifully papered throughout, and parlors frescoed by one of the best artists in the City; gas-fixtures in the attic. Price $16,000, terms to accommodate. Apply to HOMER MORGAN, No. 7 Pine-st.

VALUABLE FARM FOR SALE AT AUCTION.—The heirs of the late Anna Chadeayne will sell at auction, on the premises, WEDNESDAY, March 9, at 1 o'clock P. M., the farm lately occupied by deceased, and well known as the Stephen Conklin property, situated in the town of New-Castle, 32 miles from New-York, 2½ miles northeast of the village of Mount Sing, 3½ miles west of the Harlem Railroad, and 2¼ miles from Croton Lake. Said farm contains about 100 acres of highly cultivated land, 15 of which is ridge meadow, 10 of beautiful timber, and the remainder in orchard, at a good bearing age. There are on the premises a large and commodious house, barn, cow-house, wagon and carriage-houses, and all other necessary buildings; also, a never-failing well of excellent water at the door, offering altogether the greatest inducements to those wishing a good farm and splendid country residence.

For reference, inquire of WILLIAMS, STEVENS & WILLIAMS, Broadway; NELSON J. WATERBURY, General Post-office, New-York; BARNARD RICE, Clinton Market, New-York; STEPHEN C. CHADEAYNE, No. 11 Cornelia-st.; CHADEAYNE & BROTHER, Yonkers; S. C. SUTTON, Bedford; DAVID CHADEAYNE, on the premises.

FOR SALE—A FARM, BEAUTIFULLY SITUATED, one mile from the Morristown Court House, New-Jersey, containing about 80 acres, well divided into meadow, plough and woodland; is in a high state of cultivation, newly fenced, watered by a stream running through the centre, and is well stocked with fruit, such as apples, pears, cherries, &c. The accommodations are a commodious dwelling, barn, newhouse, granary, &c., with an never-failing well of water. N. B.—The above farm, if not sold at private sale previous to Feb. 18, will then be offered at vendue, at 11 A. M., on the premises, with the stock, horses, cows, sheep, hay, grain, harouche, wagons, farming utensils, &c. For further particulars, inquire of C. V. FREEMAN, Esq., Morristown, or of the owner, GILBERT HOPKINS, New York, No. 37 Fulton-st., 3d story, from 11 to 12½ o'clock.

FARM FOR SALE.—A FARM OF FIFTY ACRES, pleasantly situated opposite the village of Belleville, Bergen County; may be divided for two country seats; adjoining the Jersey City Water-Works, the Passaic River, and the turnpike leading to New-York; about miles from the City; two dwellings, with kitchens, two good wells of water, large barn, wagon-house, carpenter-shop and other out buildings, young apple orchard, good garden, with different kinds of fruit, all in good order. Water may be conveyed over any part of the farm, and above the top of any building, from the water-works. Will be sold on easy terms. Apply to JAMES D. ACKERMAN, No. 228 Bowery, or of PETER J. ACKERMAN, No. 22 Nesbit-st., Newark, N. J.

FOR SALE—AT MORRISANIA WESTCHESTER County, a two-story and attic house with a wing, containing 14 rooms and a good cellar, with half an acre of land. On the premises are a good well, cistern, stable, hen-house, and some fruit and ornamental trees. Situated 1½ miles from Harlem River, in an excellent neighborhood, on high ground, and perfectly healthy; communication with New-York at all hours, by New-York and Harlem Railroad or by stages, which pass the door, connecting with the Harlem steamboats and 2d and 3d-av. Railroads. Apply to J. TAYLOR, No. 53 Chambers-st.

ASSIGNEES' SALE—GREAT BARGAIN.—THE subscribers will offer at private sale the well-known Waldorph farm, situated in the town of Red Hook, Dutchess County, 100 miles from the City of New-York, near the landing, on the Hudson River, at Red Hook-Village, containing 316 acres of land suitable for grass or grain; good and extensive farm buildings; as to location and other conveniences it cannot be surpassed, either for the practical farmer or retired gentleman. The farm must be sold at any sacrifice. For further particulars address Dr. A. G. BENEDICT, Red Hook, N. Y.; or apply to E. L. FANCHER, Esq., No. 320 Broadway.

FOR SALE OR TO LET—ONE HOUSE AND lot No. 60 West 22d-st., near 6th-av.
Six houses and lots in 39th-st., between 2d and 3d avs.
One brown stone house, 227 Union-st., South Brooklyn.
These houses have all the modern improvements.
Lease of store No. 12 Spruce-st., New-York.
One lot on 9th-av., near Central Park.
Nine lots on 134th and 135th-sts., near 5th-av.
One house and lot No. 40 South 9th-st., Williamsburg.
Apply to JOSEPH H. ASH, or ASH & NICHOLLS, No. 183 William-st., corner of Spruce.

FOR SALE—FOUR LOTS OF GROUND, EACH 25 x100, on 121st-st., between 3d and 4th avs.
Four lots of ground, each 25x100, on 116th-st., between 4th and 5th avs.
One gore corner, 4th-av. and 120th-st. 31x145.
Four lots, each 25x140, on Clifton-av., Staten Island.
Three houses on 33d-st., between 7th and 8th avs., 3-story brick fronts, 20 feet front. Apply to
A. R. BRANDON, No. 108 Wall-st.

TO MECHANICS, &C.—THE SUBSCRIBER offers for sale to mechanics and others of small means several three-story brick dwellings in Van Brunt-st., near the Atlantic Docks, Brooklyn; also, several dwellings in Williamsburg, at from $1,800 to $2,500 each. They are in complete order, and will be sold very low to close an estate. Parties wishing to purchase can pay a small amount down, and the balance in small sums from time to time, to suit their convenience. Apply to R. KILLOGG, Executor, No. 90 Beaver-st., New-York.

HOUSE FOR SALE.—THE FIRST-CLASS TWO-story brick house No. 71 Amity-st., near Thompson-st., occupied since its completion by the subscriber. This is one of the best built houses in the City; the rear joins the rear of the houses facing on Washington-square, and is in perfect order. The premises will be delivered on the first day of May next, and part of the purchase money can, if required, remain on bond and mortgage. The house can be examined from 2 to 4 o'clock. Apply to GEORGE BARRELL, No. 103 Wall-st., corner of Front.

FOR SALE—A VERY DESIRABLE FIRST-CLASS house and lot, in 32d-st., near 8th-av. House 25x60, four stories, brown stone, built in best manner, with all modern improvements. Lot, 25x99; has been occupied but little over a year, and sold as the advertiser intends moving into the country, and offers a rare chance for a person wishing a house in the best part of the City. The carpets and mirrors will be sold with the house, if desired. For particulars, and in order to examine the house, address Box No. 1,796 Post-Office.

A FARM FOR SALE—OF ABOUT 15 ACRES, with good buildings, &c., in Westchester County about 20 miles from New-York. Also, a house and lot in Brooklyn, near Wall-st. and South Ferries, substantially built, brick, three story, and with beautiful view of the Bay. Lot 25x100; house 25x30. A large portion of the purchase money may remain on mortgage, or would exchange for property in central part of Brooklyn. For particulars inquire of J. E. SAYRE, No. 157 Atlantic-st., or No. 37 Whitlow-place.

No. 28.—Balance of deposit in Knickerbocker Bank, $1,630 67.

FERRY LEASES AT AUCTION.—BY VIRtue of the authority vested in him by the Legislature of the State, and the ordinances and resolutions of the Common Council, the Comptroller will sell, at public auction, to the highest bidder with adequate security, at the City Hall, on WEDNESDAY, Feb. 9, 1859, at 1 o'clock P. M., a lease of the Ferry, as at present established, from the northerly basin at Peck-slip, New-York, to the foot of South 7th-st., Brooklyn, E. D., (Williamsburg,) or to some landing or place in said Brooklyn adjacent to the foot of said South 7th-st., with all the rights, privileges and advantages thereof belonging to the Corporation of the City of New-York, for the term of ten years from the first day of May, 1859.

ALSO,

At the same time and place, the Comptroller will sell at public auction, to the highest bidder with adequate security, a lease of the Ferry from the foot of Grand-st., East River, New-York, to the foot of Grand-st., Brooklyn, E. D., (Williamsburg,) with all the rights, privileges and advantages thereof belonging to the Corporation of the City of New-York, for the term of ten years from the first day of May, 1859.

The conditions and covenants of the lease to be in the usual form of Ferry Leases heretofore entered into by the Corporation of the City of New-York.

The lease for each of the above-named Ferries to be made to conform to the requirements of the City Charter and the ordinances of the Common Council in relation to Ferries, and also to contain covenants on the part of the lessee that he will conduct and manage the said Ferry agreeable to such rules and regulations, and such laws as now are or may hereafter, from time to time, be made or passed by the Common Council of the City of New-York.

CONDITIONS.—The purchaser of the Ferry Lease and its appendages, in each case, will be required to pay, at the time of the sale, to the Collector of the City revenue, a sum equal to ten per cent of the amount bid, for the annual rent, to apply on the rent of the first year, in case he executes a lease with the usual covenants, otherwise to be forfeited to the Corporation. He will be required, also, to furnish an obligation, at the same time, executed by two sureties, to the effect that he will execute a bond with sureties to be approved by the Comptroller, for the punctual payment of the rent quarter-yearly, and for the faithful execution of the covenants of the lease. The fees of the auctioneer and the expense of the lease to be paid by the purchaser; and no expense whatever is to be incurred by the Corporation for or in connection with the pier, slip, bulkhead or premises proposed to be leased during the term of the lease.

Should the lease of the above-named Ferries, or either of them, be purchased by parties other than the present lessees, they will be required, in accordance with the provisions of the laws of the State, to purchase at a fair, appraised valuation, (should the present lessees desire to sell,) the boats, buildings and fixtures necessary for the purposes of a Ferry, said value to be fixed by persons selected by the old and new lessees, in case the parties cannot agree as to the amount to be paid for the same.

The lease shall also contain a covenant requiring each Ferry boat to have attached to its engine a fire apparatus or force-pump, with not less than 400 feet of hose, of the quality and dimensions as that used by the Fire Department of the City of New-York, and to be used for the extinguishment of fires whenever required by the Chief Engineer, or his assistants, of the Fire Department of the City of New-York, for which services the lessee shall receive $20 per for each hour engaged, and no time to be counted less than one hour.

DEPARTMENT OF FINANCE, COMPTROLLER'S OFFICE, NEW-YORK, Jan. 20, 1859.
ROBERT T. HAWS, Comptroller.

N. B.—The sale of the above Ferries was advertised to *take place on the 21st of December, 1858*, and was postponed from that time until Thursday, Jan. 20, 1859, and is again postponed, as above, to Wednesday, the 9th day of February, 1859.

CITY OF NEW-YORK, DEPARTMENT OF FINANCE, COMPTROLLER'S OFFICE.
CORPORATION PROPERTY TO BE LEASED AT PUBLIC AUCTION.—The cellars connected with the several public Markets of the City, and also sundry lots, tenements, and buildings, belonging to the City, will be leased at public auction, at the City Hall, on THURSDAY, March 3, 1859, at 1 o'clock P. M., for the term of five years from the 1st day of May next.
Catalogues of the property to be leased, with the terms and conditions of sale, can be had at the Comptroller's Office.
By order of the Commissioners of the Sinking Fund.
ROBERT T. HAWS, Comptroller.
FEB. 1, 1859.

NOTICE.—THE COMMITTEE ON FINANCE OF the Board of Aldermen will meet on MONDAY, the 7th inst., at 2 o'clock P. M., in room No. 9, City Hall. All parties having business before said Committee will be present at the above mentioned time and place, without further notice. JOHN J. BEADLEY, } Committee
T. W. ADAMS, } on
JAMES OWENS, } Finance.

CORPORATION NOTICE.—THE COMMITTEE on Assessments of the Board of Aldermen will meet on MONDAY, the 7th inst., at 2 o'clock P. M., instead of Thursday, the 3d, on account of the absence of two members of that Committee. THOMAS STEPHENS,
Chairman of the Committee on Assessments.

THE OWNERS OF GOODS AND ARTICLES now on the premises No. 620 Broadway, are hereby notified to remove the same immediately therefrom.
HENRY DOLAN.

AFFAIRS AT ALBANY.

Proceedings for Fugitive Slaves—Progress of the Regulatory Bills—The Connecticut Boundary Commission—The New Notaries Public.

From Our Own Correspondent.

ALBANY, Wednesday, Feb. 2, 1859.

This morning, while Mr. LLOYD GARRISON and a deputation of Abolitionists were in the gallery of the Assembly Chamber, Mr. FOSTER presented a petition for the prohibition of fugitive slaves on New-York soil. The usual Select Committee—as the State has twice disposed of the subject—will be raised, but none to present this obnoxious class of our fellow men. The motion was seconded by a New-York member, and a joint chorus of ayes carried it,—so unanimously and heartily that the lobby spectator in the gallery shook his sides with laughter and satisfaction. The Registry bill, too, as the result of its discussion in Committee of the Whole, yesterday, with the exception of its 'Illinois' progeny, now inserted before any amendments were agreed on. It was made the special order for next Wednesday. The bill was only put upon the files this morning, and if any who desire to give testimony time to read it, or have time to think over this bill will prove to be their opportunity. GARROW, who cast some startling bolts lately, prophesies that the Times will be passed this session. The bill now in Committee of the Whole is the most perfect of the kind ever proposed, and, if it is not passed this session, the Registry law will be passed next session. The bill now in Committee of the Whole is the most perfect of the kind ever proposed, and, if it is not passed this session, the Registry law will be passed next session. The minority, of whom I am one, are pondering whether one which will be more perfect shall be reported.

The Governor-Message sent in a special message concerning the Connecticut Boundary Commission. The commission recited briefly the facts of the old dispute and the attempt to the division line, and the former appointment in 1857, the appointment of Commissioners by Connecticut and New-York in 1858 and the steps taken by them in the latter year. Referring to the determination of the doubts then existing, it stated that between a line surveyed by direction of the Commissioners and the one located but by tradition and mutual by some old monuments, there is a strip about forty rods wide containing some two hundred inhabitants. The Connecticut Commissioners insisted upon the surveyed line, which would add this strip to their State. The New-York Commissioners refused to accede to any other than the traditionary line. He says that this difference became personal and bitter quarrel, aggravated by a controversy about the division of the expenses between the two States. He complains that the expenses of the Commission have been unnecessarily and disproportionately large, and recommends that authority be given him to appoint a new Commissioner to settle the line in may be found expedient, and that the means to meet the expenses be appropriated in advance.

The friends of the Commissioners complain of this message as unfair. From the reports already presented to the Legislature and published, it seems that the traditionary or recognized line has been insisted upon by them under the best legal advice, as the only one that could in any case be sustained. Several Judges of the Supreme Court have advised them that the two States had no power even by mutual agreement, to transfer territory from one to the other as the Governor recommends. The correspondence shows, as they claim, that Governor MARCY from entering into any personal dispute, they most carefully and successfully avoided it.

Upon the points of expense and other matters of the message, their friends claim that even greater injustice is done to the Commissioners. We shall hear from them probably before long.

The Judiciary Committee reported to the House to-day the bill now made famous, providing for the satisfactory trial of States Island in sandlarks, and it takes the first place on the General Orders. The Agricultural Committee put a knife to the throat of the bill to prevent fraud in the sale of garden seeds, alleging that it was impracticable in its details. But the House overruled the bill and recommitted it.

The Senate to-day did no great deal. Senator WILLIAMS introduced a bill to protect the liberty of witnesses—in effect, abolishing imprisonment for the offence of having or a crime committed. A brief executive session was held. There has been, of course, a great deal of speculation whether Mr. Justice Barnard will be reappointed to his office. You may rely upon it that he will. It takes a week for an executive nominee to be confirmed by the Senate. To-day are announced the following Notaries Public, who came through the mill last Wednesday.

GLAUCUS.

NOTARIES PUBLIC.

KINGS—Leh Lesquer, H. B. Hubbard, Theophilus C. Callicot, Wessel A. Smith, George Field, E. L. Sanderson, Nathan V. Allen, Gordon L. Ford, Jared Sperry, George W. Cook, John N. Taylor, Augustus H. Stoll, William Hughes, of Brooklyn; Alexander Wilder.

QUEENS—William Aug. Walker, Hempstead; Henry A. Bogert, Flushing.

RICHMOND—James Ridgway, Northfield.

SUFFOLK—John O. Ireland, Greenport.

NEW-YORK LEGISLATURE.

SENATE.... ALBANY, Thursday, Feb. 3.

BILLS REPORTED FAVORABLY.

To prevent the issue of false bills of lading, and against the fraudulent transfer of property by shipowners.

BILLS REPORTED UNFAVORABLY.

To amend the law of divorce providing for a divorce, when people have resided in other States.

Mr. ROY, from last year's Committee to examine the Health Department of New-York, reported in writing on Friday a bill, the reorganizing of the Board of Health, making the head of the department a medical officer.

Mr. SEWARD's resolution, reorganizing the Court of Appeals, was adopted.

ASSEMBLY.... ALBANY, Thursday, Feb. 3.

The Morning Session in the Assembly was occupied in debate on the bill to authorize the trial of the Quarantine Incendiaries in New-York or Brooklyn.

Mr. WOMAN spoke strongly in favor of the bill, and Messrs. CARTERS and TOMLINSON in opposition. Messrs. CONKLING and CAMERON also supported the bill.

The Assembly held an Evening Session to-night, to consider general orders, but no bills of general interest were acted upon.

The bill to pay Judge, in the City of New-York, $6 per day, was debated, but meeting with opposition, progress was reported upon it.

The bill to amend the act regulating pilotage through Hellgate Channel was taken up.

Mr. CAMERON spoke in favor of the bill, which he said would do protect the pilots from being defrauded out of their just dues.

The bill was ordered to a third reading.

Further from Hayti.

PROGRESS OF THE REVOLUTION—THE INEVITABLE DOWNFALL OF SOULOUQUE.

By the arrival of the brig *R. W. Packer*, Capt. Lee, at Boston, on Wednesday, from Cape Haytien Jan. 29, we have some additional particulars of the state of affairs in Hayti. We are indebted for them to the *Traveller*.

Captain Lee states that the officials of the Emperor Soulouque at the Cape had all been ousted, the majority of them, including some of the Emperor's ordre of nobility, joining the Republican movement. The Intendente was the only one who stood out for Soulouque. He attempted to stop the movement by representing to the people that it was the intention of the Republicans to reduce them to a state of slavery, and also to the blacks that GEFFRARD was a mulatto, and, in consequence, dominate over them. [illegible] Advices from the country [illegible] reliable accounts the battle [illegible] GEFFRARD [illegible] unable to keep his army. The [illegible] GEFFRARD [illegible] a portion of the army [illegible] the Emperor [illegible] against him.

Two of the principal officers of the Cape, on [illegible] from a terrible scene [illegible] breaking out of the [illegible] Some time after [illegible] reported to Soulouque that they had [illegible] his Government, and they were arrested. At the time of the Proclamation of the Republic a vessel was on the voyage from Port-au-Prince to convey some of the terrible dungeons of Lakoubre, where it is stated there are no less than [illegible] hundred prisoners but a few days within a few days. In regard to these [illegible] it is stated that the miserable captives were chained in the dungeons, and expected to the new of the revolution forced a way out to perish. They generally died in a few days, and one man was found alive [illegible] days and humanely dispatched by his friends.

At Aux Cayes, it is said, the [illegible] entered the revolution and was shot by the [illegible]

We learn from good authority that the whole of the north part of Hayti, of which the [illegible] part, has declared in favor of the [illegible] GEFFRARD as President. It seems [illegible] been brought to there before it actually [illegible] and immediately after the landing of [illegible] of Soulouque on the proclamation of the Republic there. Gen. E. Dantan, a prominent [illegible] Cape, and formerly Minister under President P[illegible] assumed the sole of Gen. DESSALINES, and, having sworn he could trust, sent them off to join the Revolutionists. Almost at the same time, the 18th Jan., and [illegible] Jan. 27, Fortier, one of the executive officers of the establishment of the Republic. The [illegible] to the retreat of a letter received in this city [illegible]

CAPE HAYTIEN, Jan. 11.—We have had no [illegible]

power of Soulouque to be [illegible] at Portau-Prince; it is certainly known, however, that he was at Aux Cayes, with his army, in a very miserable condition. A skirmish had taken place between the advanced guard of the two armies, and Soulouque had been defeated, many of his officers and soldiers deserting him and joining over to GEFFRARD. The South is also marching against him; his family and treasures have been embarked on board of a vessel at Port-au-Prince; there is no doubt of his intention of making his escape, as it is hardly probable that he will be allowed to return to Port-au-Prince.

Some letters received in Boston estimate the force of General GEFFRARD as high as 15,000 men, and daily increasing. The 8,000 men reported to have marched from AUX CAYES to join the Emperor, were probably legend to the Republican Camp.

It is surmised that GEFFRARD might have, ere this, struck a decisive blow, but that he is anxious, by a display of overwhelming force, to prevent bloodshed, and convince SOULOUQUE of the weakness of resistance.

A brother of General GEFFRARD has been appointed Governor of Cape Haytien by the Republicans.

Board of Aldermen.

THE MAYOR ON LEGISLATIVE INTERFERENCE WITH LOCAL AFFAIRS—THE CITY INSPECTORSHIP—PROPOSAL TO GROOVE THE RUSS PAVEMENT—THE TAX LEVY LAID OVER.

Three communications from the Mayor were read before the Board of Aldermen last evening. The first related to the bills before the Legislature in regard to the construction of railroads in this City. He thinks these bills, unless their enactment was requested or concurred in by the Common Council, strongly objectionable because they affect local interests and confer valuable privileges without an opportunity for competition. The Common Council, he thinks, are better judges whether it is expedient or desirable to construct such roads than the Legislature can be, and the right of constructing them should be advertised for and sold at auction in the same manner as the ferry grants are disposed of. The grants now before the Legislature would yield a large revenue to the City, if sold at auction. The City Railroads should be as jealously cared for as the ferry franchises, and the Mayor recommends that the Board instruct the Counsel to the Corporation to prepare a memorial to the Legislature respectfully protesting against the passage of any such bills as those referred to, unless the Common Council request their enactment. The message was referred to the Committee on Railroads.

The second communication contained a veto of the resolution calling on the Counsel to the Corporation to prepare a memorial to the Legislature for such an amendment to the charter as shall give the members of the Common Council a fixed salary. It was laid on the table.

The third communication contained the Mayor's objections to signing the resolution in favor of repairing the Comptroller's office at an expense of $5,000; the charter did not permit the passage of such a resolution, unless money had been appropriated for the object sought to be carried out; until the tax levy was passed such a resolution could not be. The message was laid on the table.

A petition from the Exempt Engine Company for 500 feet of canvas and India-rubber hose, to man with their steam fire-engine, the ordinary hose not being strong enough to contain the volume of water forced through it, was referred to the Committee on the Fire Department.

Alderman BOOTS offered a resolution directing the City Inspector to advertise for proposals to clean the streets, in accordance with former specifications.

Alderman ADAMS hoped no such resolution would be passed. They knew there was no City Inspector. Such action on the part of the Board would be illegal.

The Board refused to lay the resolution on the table, (8 ayes, 8 nays,) and the resolution was read a second time.

Alderman ADAMS was astonished that any such resolution should be offered by any member of the Board. Who would take a contract under the man who now held the office of City Inspector contrary to the charter? It was ridiculous, and this Board was making itself ridiculous in the eyes of the public, and the public press was constantly calling attention to it. The members of the Board must have noticed it. It was adding insult to injury to offer this resolution under the circumstances. Thousands of dollars worth of suits against the City would grow out of this City Inspector business. The Special Committee of Five appointed to consider the Mayor's nomination had never met, and did not intend to meet. This matter would be before the Legislature yet. There were bills now before the Legislature remodeling City Departments. The idea of the Committee's not reporting! It ought to be put in contempt. If he was a member of such a Committee and it couldn't report, he would leave it, as he intended to resign from this Committee, the present night.

Alderman PECK did not claim to be versed in the law, but he thought it very plain that the old City Inspector remained in office till a successor was appointed, and the Counsel to the Corporation had given an opinion to that effect.

Alderman ADAMS wanted to know whether the gentleman had seen such an opinion?

Alderman PECK had not.

Alderman ADAMS said no one else had either.

Alderman BOOTS said he had seen it.

Alderman ADAMS wanted to know whether it was before the Board?

Alderman BOOTS enlarged upon the necessity of cleaning the streets immediately. He said the gutters wanted hoeing out.

Alderman ADAMS agreed with him that the gutters wanted hoeing out; the City Inspector wanted hoeing out too (laughter,) and he wanted to get the gentleman to help him do it.

Nevertheless, the resolution was adopted (Ayes, 10; Nays, 7.) Aldermen ADAMS, HENRY and SEAGRIST voting "No."

A communication from William Frost, of No. 601 Broadway, proposing to groove the Russ pavement in Broadway with a machine invented by him, for 41 per square yard, was presented. Mr. Frost proposes to run one groove through the centre of each stone 1½ inches wide and of the same depth, and a second groove between the stones of the same width and depth from curb-stone to curb-stone. It was referred to the Committee on Streets.

A resolution—offered by Alderman SEAGRIST—directing the Croton Aqueduct Department to advertise for proposals for paving Broadway, from Fifteenth-street to Seventieth-street, with Belgian pavement, and submit the award of the contract to the Common Council, was referred to the Committee on Roads.

The resolution from the Board of Councilmen, appropriating $2,000 for the celebration of Washington's birth-day, was lost for want of a constitutional vote. Affirmative, 7; negative, 6.

Alderman SEAGRIST, from the Committee on Roads presented a report in favor of paving Forty-third-street.

Alderman HENRY thought the gentleman showed discourtesy to the Board in offering such a report, signed by himself alone, without consultation with the rest of the Committee.

Alderman ADAMS said he would be glad if the Special Committee on the City Inspector would present a report of any kind. (Laughter.)

The report which Alderman SEAGRIST stated was before the Board by mistake was recommitted.

The TAX LEVY was called up, and Alderman PECK moved that a Committee to confer with a similar Committee of the Board of Councilmen, with regard to it, be appointed.

Alderman BEANY moved that it be laid on the table and printed.

Alderman ADAMS called for the reading of the document, but before the reading had proceeded far the Board resolved to suspend the reading, and make the Tax Levy the special order for the next meeting.

Alderman ADAMS asked to be excused from serving further on the Special Committee of five appointed to consider the Mayor's nomination for City Inspector. That Committee would never report.

Alderman BOOTS wanted to know who the gentleman referred to when he said that Committee would never report.

Alderman ADAMS said he meant the Chairman of that Committee particularly. He (ADAMS) had no desire to serve on another Committee in which they stood four to one. He referred particularly to the Chairman of that Committee.

Alderman BOOTS did not know why the gentleman should say that he was unwilling to report. He and the gentleman had met together one day, but no other members of the Committee were present, and they could do nothing. He was perfectly willing to report.

Alderman TOOMEY moved that the Board adjourn.

Alderman PECK moved that Alderman ADAMS' resignation be accepted.

The Board accepted it.

Alderman ADAMS hoped Alderman TOOMEY would take his place on the Committee.

Alderman TOOMEY said he accepted it.

The President appointed Alderman TOOMEY in Alderman ADAMS' place, and the Board adjourned to Monday, at 5 P. M.

The Committee on Markets.

ABOLITION OF STANDS AROUND THE MARKETS—REMOVAL OF WASHINGTON MARKET.

Resolutions have been recently introduced into the Board of Councilmen directing their Committee on Markets to investigate the authority by which stands are allowed to be erected on the sidewalks around Fulton, Washington and Clinton Markets, and to inquire into the expediency of removing Washington Market to some location further up the river.

Yesterday afternoon the Committee met to consider these subjects. A large number of butchers from the different markets were present.

The question concerning the stands on the sidewalks was first taken up.

Mr. ADAMS, from Washington Market, said that the stands there were put up with the sanction of the Common Council as long ago as 1843.

James McELRATH made the same statement, but he could not tell definitely by whom the authority had been given—whether it was derived from the Committee on Markets originally, or from the clerks. He thought that it would be hard for men who had been making their living by keeping those stands to be turned out of them now. He had paid $3 rent per week.

Councilman BOWERS said that he had a familiar acquaintance with Fulton Market, and that those who [illegible] basement stores under the markets [illegible] the most of the sidewalk stands. They [illegible] their light seriously, and some, on this [illegible] refused to pay rent.

[illegible] from Washington Market, described [illegible] stands on the West-street pavement. [illegible] and outside stands are nine feet [illegible] Indian could walk between them without inconvenience or injury to their [illegible] There was no room inside or outside of the Market to spare. Gangways had recently been made in the Fulton Market for safety.

Mr. FRANCIS, from Fulton Market, appeared by his attorney, who stated that Mr. F. was doing business at a basement store at Fulton Market, on the corner of South-street. He paid $1,[illegible] rent, and those having charge of the Market had allowed the erection of a stand immediately in front of his place, where a business of the same kind with his was pursued. This was in direct violation of his lease, and he had frequently complained without effect.

The Committee decided to postpone the consideration of the removal of stands until they could visit the different localities themselves. They then took up the question of removing Washington Market.

Mr. TILLOTSON spoke at considerable length against the measure. No better location, he insisted, could be found. If it was removed to the foot of Fourteenth-street, it would be between two gas houses. It is a well-known fact that meat absorbs gas. The consequences to those who ate meat which had been in such a place would be disastrous. Explosions might ensue. Some thought that it would be an advantage to have the Hudson River Railroad run through the Market, as it would, were it in their locality. Daily inquiries would be inevitable. Mr. T. said that all this talk of removing the Market was for Bonaparte. He had appeared before Committees previous to this who had sold him land upon which he had never paid, but that they were not weight enough.

Alderman BURTON, half-cocked, what he supposed was meant by this, put his hand into his pocket and drawing out a handful of quarters and shaking them said, "That's what they mean by it."

Mr. BURTON thanked him for the compliment. Mr. T. warmly disclaimed the idea of his meaning anything personal. No one appeared to speak in favor of the removal of the Market, and this subject was also postponed for further consideration.

Mexico.

AFFAIRS BETWEEN THE CONSULATE AND PARIES—DETERMINATION OF THE LEGAL INTEREST IN SOUTH AMERICA.

A correspondent of the New-Orleans *Picayune* writes from Minatitlan, Jan. 19:

The gratifying intelligence reaches us overland, via Tabasco, brought thither probably by coasters from Campeachy, that the war of races at Yucatan is near being brought, for the present, to a close. The happy result, if true it shall prove to be, is due to Gen. CASTRO, on the one side and discretion on the other. A few weeks since, as perhaps you already have intelligence, the dominant race, tired of the continued depredations of the Indian population, resolved to use with the force of the nation to bring this unnatural war at once to a close. The moment seemed auspicious; the wet season was nearly over; the dry, most favorable for military operations, was setting in; and their own family troubles seemed to be permanently settled by the triumph of the Liberal Party. A constitution was held at the capital, and after much reflection it was finally resolved to make a final appeal to the natives, before a last resort to arms. This appeal fortunately took the friendly form of a general amnesty, issued over the sale and signature of the Governor, Inesorra. It promises:

1. An unconditional amnesty to all the Indian population in insurrection, provided that by the 20th of January, (to-morrow,) at latest, they lay down their arms and place themselves at the disposition of the State.

2. The same free pardon is granted, and under the same conditions, to individuals of other races united with the rebellious natives.

3. Those who do not accept the amnesty, shall be pursued, as enemies of society, to their most distant hiding-places, and the prisoner made, if chiefs or deserters from the Supreme Government, shall suffer the punishment of death.

4. All persons, on their acceptance of the amnesty, are at once to be set at liberty.

5. The Government will courteously receive from the malcontents, for the purpose of more clearly making known the views, feelings, and intentions, which motive them, they chosen representatives, at the expense of the commissioners to be paid by the Government, on the promise of their submission to the laws and authority of the State.

The amnesty was published both in the Spanish and Maya languages, and extensively circulated, not only along the coast but in the most distant sierras. It was also accompanied by a friendly appeal from the Governor, showing the injustice of the war itself from the beginning, and the folly of pursuing it; and by a similar one from the commander-in-chief, who, after alluding briefly to the recent triumph of the Liberal Party, (with which the Indians always have most sympathy,) gave them clearly to understand what they might expect, now that all the military forces of the State would be available, in an auspicious season, for pursuing the war, unless they at once laid down their arms, to their utter extermination against them.

It is this generous promise of amnesty, and these firm but friendly appeals, that have determined the Indian population generally, on the intelligence reached us, to lay aside their hostile attitude and submit themselves to the laws and authority of the State. It is to be hoped that it may prove true, in the main.

From Tabasco itself, the intelligence is of a less gratifying character. SARIAT had escaped from the place of his quasi-confinement since the triumph of the Liberal Party, and, it was feared, with the intention of again organizing the adherents of the opposing faction. Should such a movement be in contemplation, the recent events at the capital will doubtless go far towards encouraging it. In several places on the coast, also, the Government had been compelled to station additional troops for the preservation of peace.

TELEGRAPHIC MATTERS.—It is understood that Mr. F. O. J. SMITH has consummated arrangements for the sale of all his Telegraph interests to the American and the Magnetic Telegraph Companies for the sum of about three hundred thousand dollars, which includes Mr. SMITH's two-thirds ownership of the New-York and Boston Union line, the Boston and Portland line, and various claims against Western and Southern Telegraph Companies, alleged to be worth one or two hundred thousand dollars. The rumor is also current that the negotiations between the American and Magnetic Telegraph Companies, looking to a speedy consolidation of interest between Nova Scotia and New-Orleans have been brought to a satisfactory determination.

NOVEL METHOD OF TREATING CONSUMPTION.

From Halsted's late Treatise on Motorpathy.

"First put the patient into a warm medicated bath, into which is poured a continuous current of negative electricity. This chemically destroys the oily acids and other impurities of the cuticle, setting free all scrofulous and morbific humors—not only those upon the surface, but inviting the whole organism, and the eighteen miles of excretory vessels in the system to throw off by those natural channels the dead and impure matter in the circulation. Then when the myriads of mouths, freed of their contents, are open to take in the chemical food of the second bath, the patient is removed to it. To this second bath has been previously added some of the blood-renewing and purifying chemicals, as the hypophosphites of lime and soda—the phosphate of potash—phosphoric acid—phosphate of iron, or some of the sulphurette, as indicated by the temperament, disease or idiosyncrasy of the patient. These chemical ultimates are alterative and nourishing, and capable of repairing losses in many parts of the body; and the little hungry mouths of the absorbents suck in the stimulating nourishment. The electric currents, from the positive pole of the chemical battery which is supplied in this bath, powerfully coact with the efforts of nature, which are always in the endeavor to carry healthy deposits to parts where most needed. Diseased nature is ever thirsting after healthy supplies; and in the effort to remove disease.

The alternating between these two baths will at once be seen to possess great advantages in scrofulous diseases; and in all complaints connected with, or dependent upon impurities of the blood.

Articles to the same end are given by the mouth, by enemas, and by inhalation, in consumption and bronchitis, to break up tubercular deposits, heal ulcers, and restore tone and freedom of action to the air-passages. In some cases of lung disease medicated oils are used over the chest and body on removal from the second bath, to break up night sweats, and to keep up a continued stimulation from the absorbents of the skin; an object of essential consideration in diseases of this nature.

These, together, are valuable auxiliaries to the peculiar stimulation of cold baths and the invigoration of Motorpathic treatment; which last permeates and braces up, as with fibres of strength and vitality, the whole system, not only freeing it from disease, but building up the constitution and making it a life-battery of power." *Treatise on Motorpathy*, 25 cents. Address H. HALSTED, M. D., Round Hill Water-Cure, Northampton, Mass.

NOTE.—Dr. HALSTED will be in New-York (at St. Nicholas Hotel) Tuesday and Wednesday each week, during this month only. Calls received from 10 to 12 A. M., and from 5 to 7 P. M. Calls of inquiry and circulars free.

THIS IS IMPORTANT.

GAYETTY'S MEDICATED PAPER, for the water-closet, may be really classed as both a necessity and a luxury. It ought to be used by the healthy, because all other paper (we make no exception) is poisonous, either in a large or small degree, and produces Piles. Individuals suffering with Piles in any shape will be cured speedily and surely by GAYETTY'S Medicated Paper. Each sheet, let us remind the reader, is water-marked by the name of "J. C. GAYETTY," and a *fac simile* of the signature is on each box; any other is spurious and pernicious. Sold at the Dépôt, No. 41 Ann-street, New-York; by Mrs. HAYES, of Fulton-street, Brooklyn; and by all respectable druggists. Beware of imitations.

THURSDAY, Feb. 3—P. M.

The dealings at the Stock Exchange have assumed a steadier tone, and prices at the close this afternoon were firmer for Missouri 6s, New-York Central, and some of the Western shares. Panama, on the other hand, was ¼@¾ cent. weaker than yesterday. The most marked exception against all regularity or steadiness continues to be in Pacific Mail. In this case, it appears the *Bulls* have been fighting *the Tiger* blind, for sixty days past, as well as the *Bears* in the open market. But now that the animal has shown his teeth, through Mr. D. B. ALLEN's advertisement of an opposition boat for the 10th March, the movement in the stock varies according to the estimates placed upon the earnestness and ability of Mr. VANDERBILT and Mr. ROBERTS to crush out the Mail Company on the Pacific side, in default of forcing their own terms of division of business on the Atlantic side. That no real competition is to spring up hence to Aspinwall, is scarcely pretended. It would be like VANDERBILT fighting himself, as he and his son-in-law, the Hon. HORACE F. CLARK, are believed to constitute the main (*or money*) spring of ROBERTS' line. That the party, including Mr. ROBERTS himself, have proved themselves too much for Mr. DANAGH and his colleagues in the Mail Company, as well as for Wall-street, is pretty sure *thus far*. The means to this end may be questionable—and most people will probably believe them very questionable—but there has been so much of close corporation arrogance on the other side, and the subvention of VANDERBILT so extraordinary in its nature, that the Press and the public have no large amount of sympathy in the result. If the Government, in its present straitened means, should ever deny the Company another Mail contract, confining the future postal service to the ordinary Ocean postages, the managers of the concern, if they could be separated from their seven hundred shareholders, would deserve no better treatment for their connection with VANDERBILT. The public regrets would be about the same as for the failure of VANDERBILT, CLARK and ROBERTS to collect $400,000 from the Government for arrearages to the Atlantic line. This last claim, by the way, we presume will now be given over, as a good share of the sum must have been realized in another way, nearer Wall-street! The Pacific Stock opened to-day at 76, seller 60 days; sold up to 80, cash; then fell back on the Street to 76½, and finally closed 78@78½ ⅌ cent.

The sales of New-York Central were about 4,000 shares, at 82½@¾@½@¼, closing 82½ bid. Panama, sales at 114¾@¼@113¾, and then 114 bid. Rock Island in steady demand at 58¾@59, closing 59 bid; Illinois Central improved to 67 ⅌ cent. The January traffic is $131,736, against $130,000 same month last year; the land sales $54,000. Sales of Missouri Sixes at 83¾@84, and 84 bid at the close. A sale of $10,000 Tennessees at 89¾ ⅌ cent. Mr. DRAPER held a very spirited sale of Tennessee State Indorsements, for account of the Comptroller of the Tennessee Banking Department, with the following result, the prices being above the recent private sales of the same class of securities. The Bonds bear 6 ⅌ cent. interest, and were sold as with interest from Jan. 1:

$34,000 Nashville & Chattanooga R. R. 6s	80½
2,000 Nashville & Chattanooga R. R. 6s	81½
9,000 Nashville & Chattanooga R. R. 6s	79½
20,000 Memphis City 6s	81½
20,000 Memphis City 6s	81
1,000 Memphis City 6s	80½
26,000 East Tennessee and Virginia 6s	78½
10,000 East Tennessee and Virginia 6s	78½
7,000 East Tennessee and Virginia 6s	78½

At the Brokers' Board the bids for the New Federal Loan were firmer at 102½ ⅌ cent.; no sales. The additional payments into the Sub-Treasury on this account to-day were $280,000. The Customs were $153,000 yesterday and $180,000 to-day.

The market for money is quiet at 5 ⅌ cent., on the rule to the established Stock Brokers. Some of the call loans, made earlier in the week, as high as 6 ⅌ cent. have been paid off. The offering of mercantile bills outside of Bank has rather fallen off since the increased rates to 5@6 (for short and 6@7 ⅌ cent. for long dates. Exchange is nominal, as no packet goes before the Boston steamer next Wednesday.

A movement is notified in the Assembly to change the form of the Weekly Bank Statements, as now advertised in this City. The alteration if made would impair the value of the returns for the past six years, and would be of no practical service to the public, while destroying the uniformity of the tables for reference.

The Secretary of the Treasury to-day notified the bidders for the New Loan at 102.05 ⅌ cent., that their offers are accepted.

Receipts of New-York and New-Haven Railroad Company for January, 1859:

Passengers	$71,115 39
Freight	13,000 00
Total	$84,115 39
Due other roads	18,837 23
Net	$65,278 16
January, 1858	55,151 87
Increase in January, 1859	$10,126 29

An interesting statement from the Mutua Benefit Life Insurance Company appears in our advertising columns.

BANKING AND FINANCIAL ADVERTISEMENTS

SIGHT AND TIME BILLS on all the Southern cities, purchased by DUNCAN, SHERMAN & CO. Bankers, 52, Wall.

Real Estate.... WEDNESDAY, Feb. 2.
